ProTech
protechtraining.com

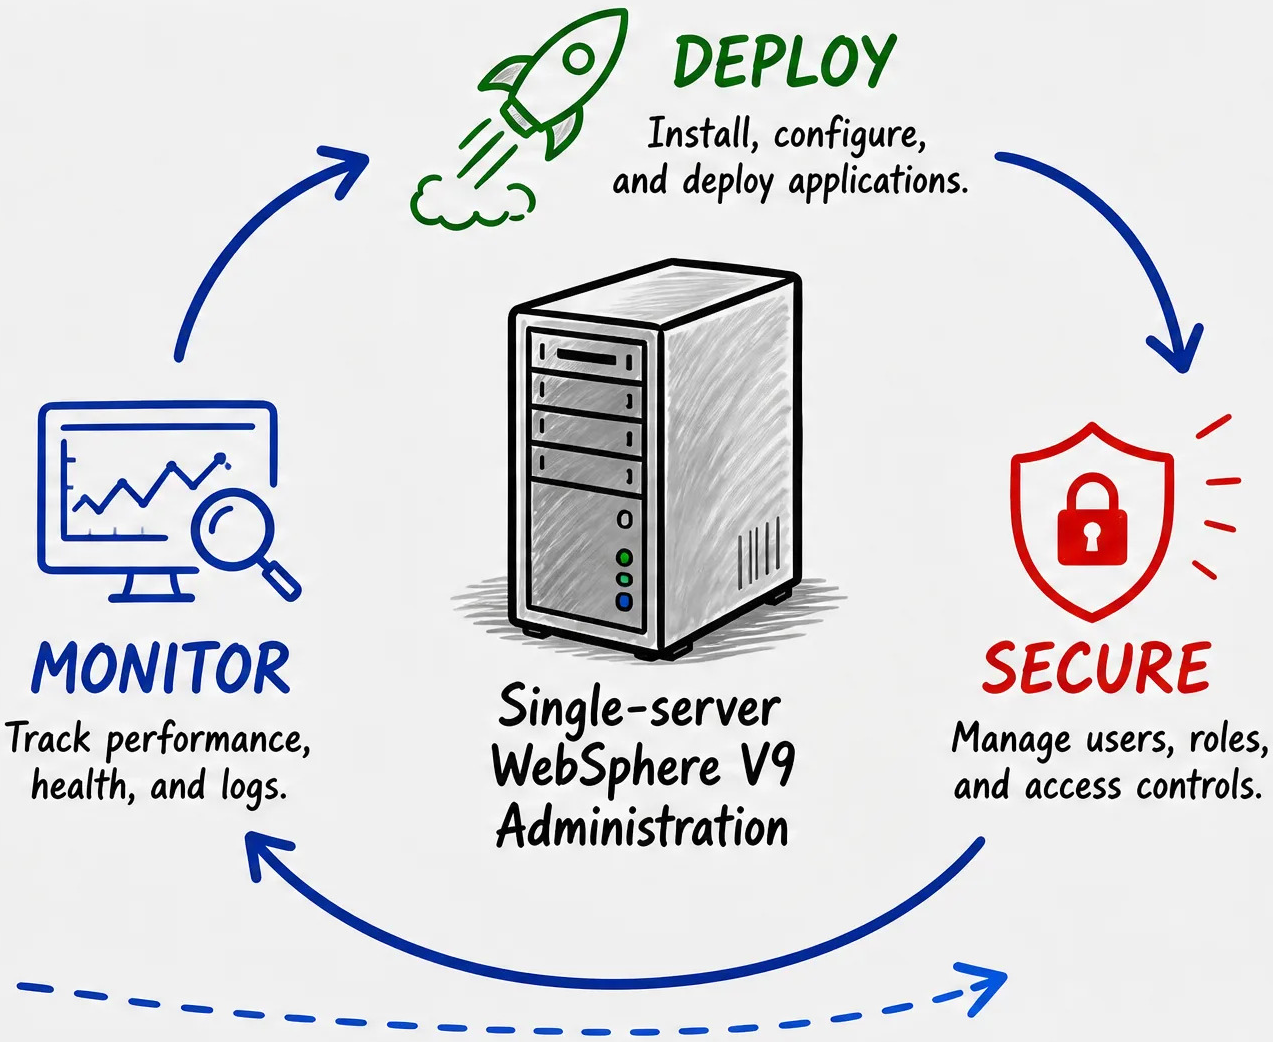

"Theory gives you the map; hands-on practice lets you drive."

What This Class Is About

Single-server WebSphere V9 Administration

> We configure and maintain the foundation for enterprise Java.

Theory Meets Hands-on Labs

THEORY

Learn it.
Do it.

HANDS-ON

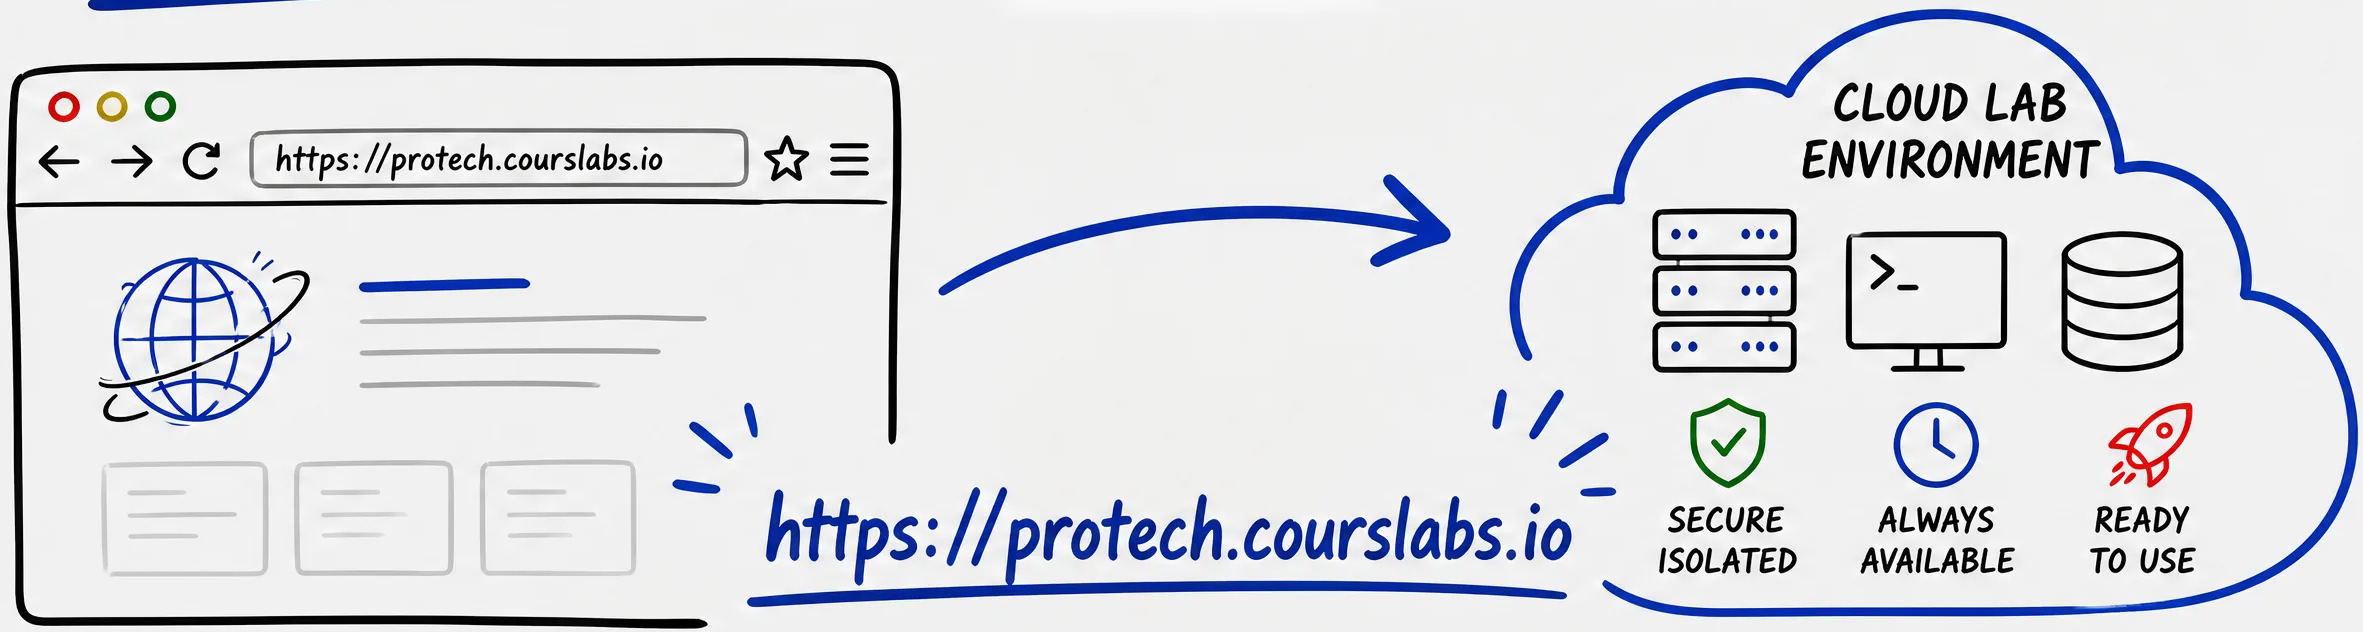

> Theory gives you the map; hands-on practice lets you drive.

Curious minds balance best.

Your Lab Environment

> "Your safe space to break things and learn."

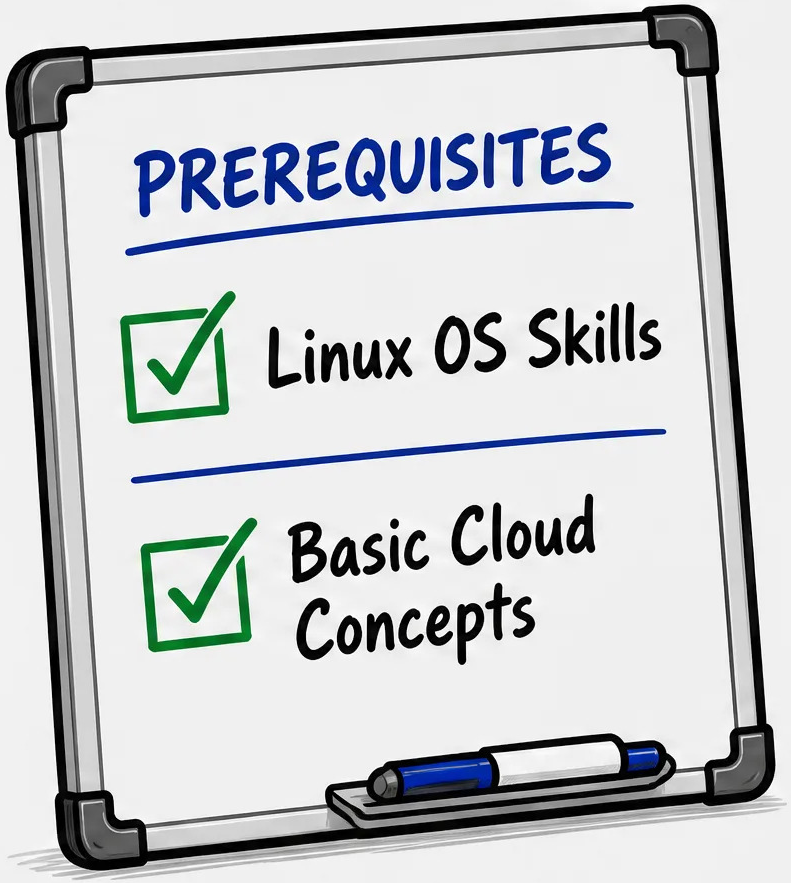

LEARN
Experiment and build skills.

FOCUS
Practice with real scenarios.

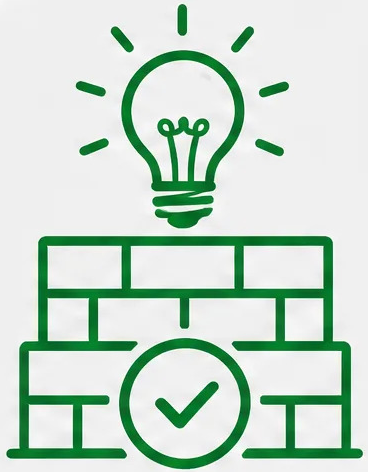

GROW
Gain confidence and expertise.

SAFE
Isolated, secure, and risk-free.

Course Prerequisites

What you bring to the table

We build on your existing **operational foundation.**

Who This Course Is For

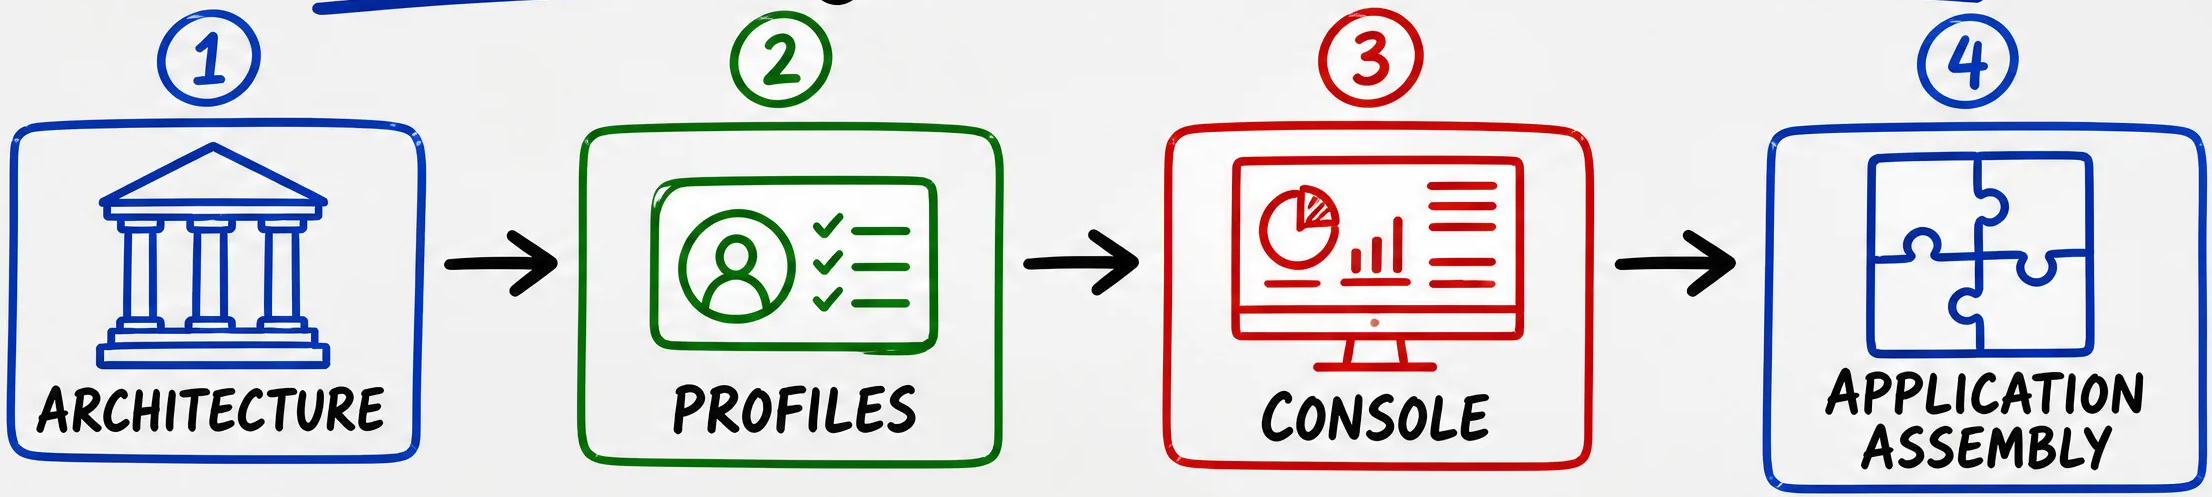

The enterprise team

WebSphere administration touches every part of the application lifecycle.

Agenda: Core Architecture

Building the foundation

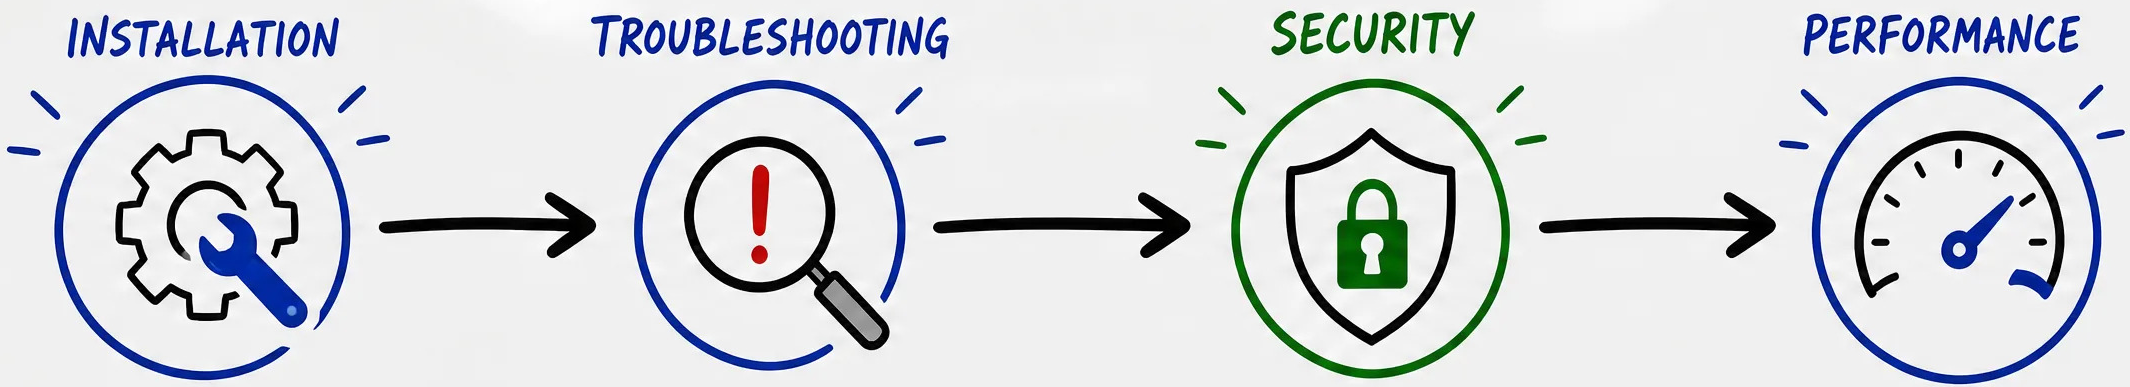

> "You cannot manage what you do not understand."

Agenda: Operations and Security

Running the environment

> Administration is the continuous process of keeping the contract.

Fox's Rules of the Road

Learn from the Fox

1. Ask questions.
2. Break things.
3. Have fun.

> "The only bad question is the one you keep to yourself."

Ready to Begin

Let's get to work

MODULE 1

"Welcome to WebSphere Administration."
