MODULE 12 — INTELLIGENT MANAGEMENT

ProTech
protechtraining.com

PROTECT SERVICE AS DEMAND MOVES

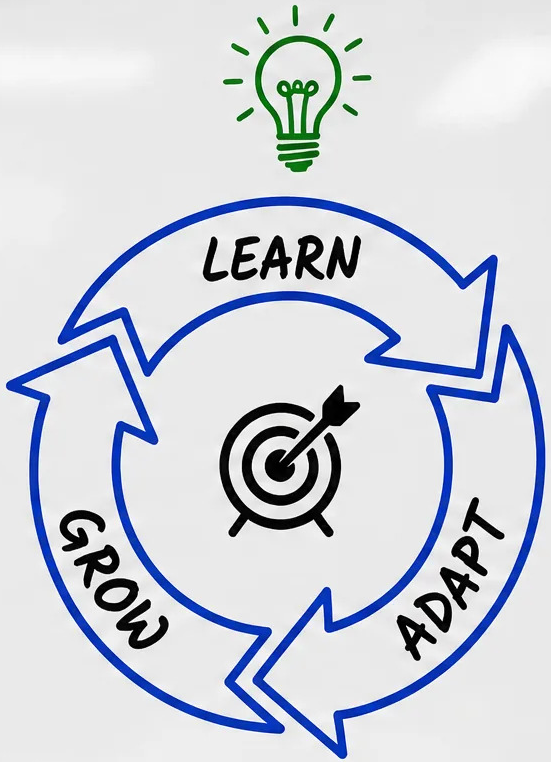

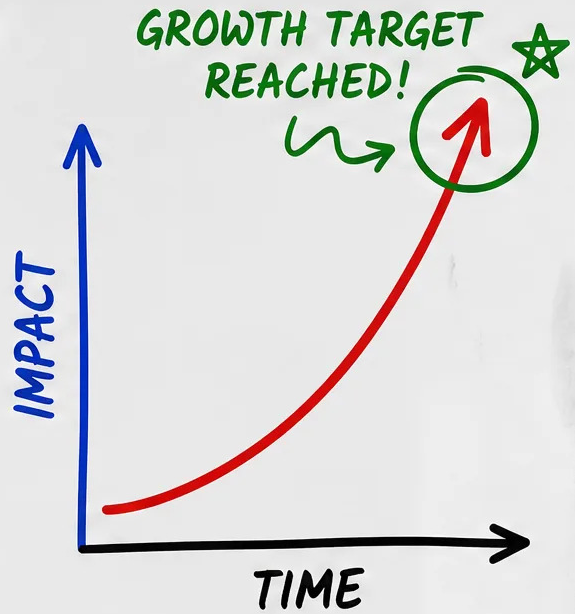

DYNAMIC OPERATIONS TURNS LOAD INTO A MANAGED DECISION.

② Strategy Session

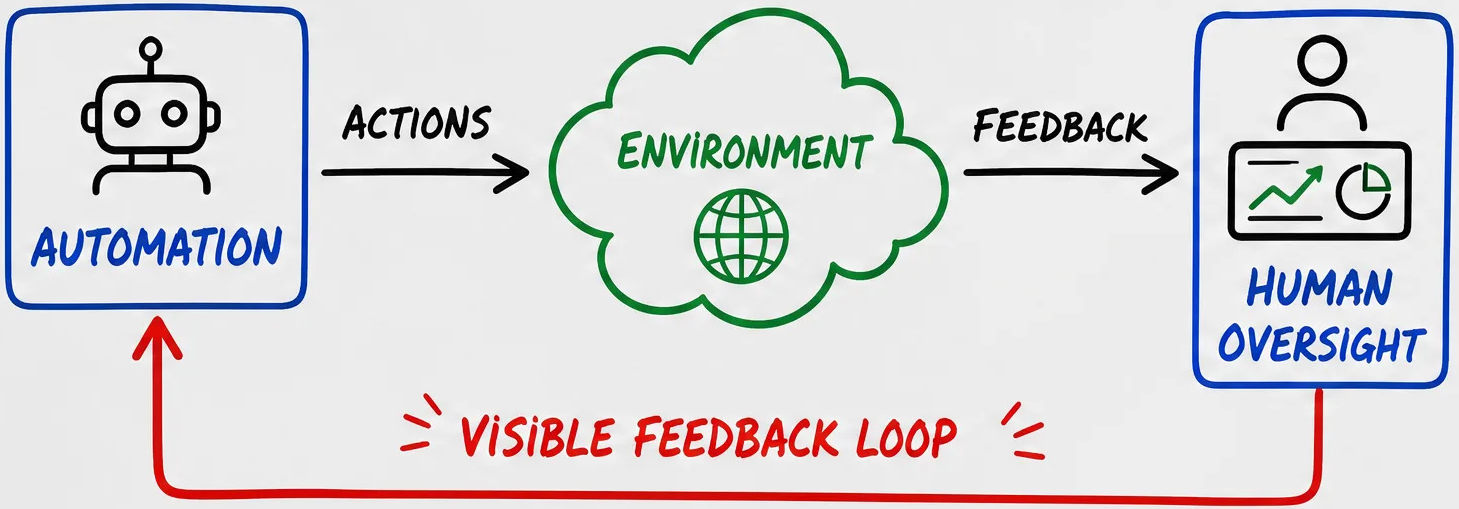

Intelligent Management is a capability set, not a Retired product name.

Dynamic Operations turns load into a managed **decision.**

3 AUTOMATION IS SAFE ONLY WHEN THE FEEDBACK LOOP IS VISIBLE.

VISIBLE FEEDBACK TURNS AUTOMATION INTO ACCOUNTABILITY.

WHY IT MATTERS

- **SEE IT.** MAKE FEEDBACK VISIBLE.
- **TRUST IT.** VALIDATE CONTINUOUSLY.
- **CONTROL IT.** CLOSE THE LOOP.

The Right Router Depends on the Controls You Need.

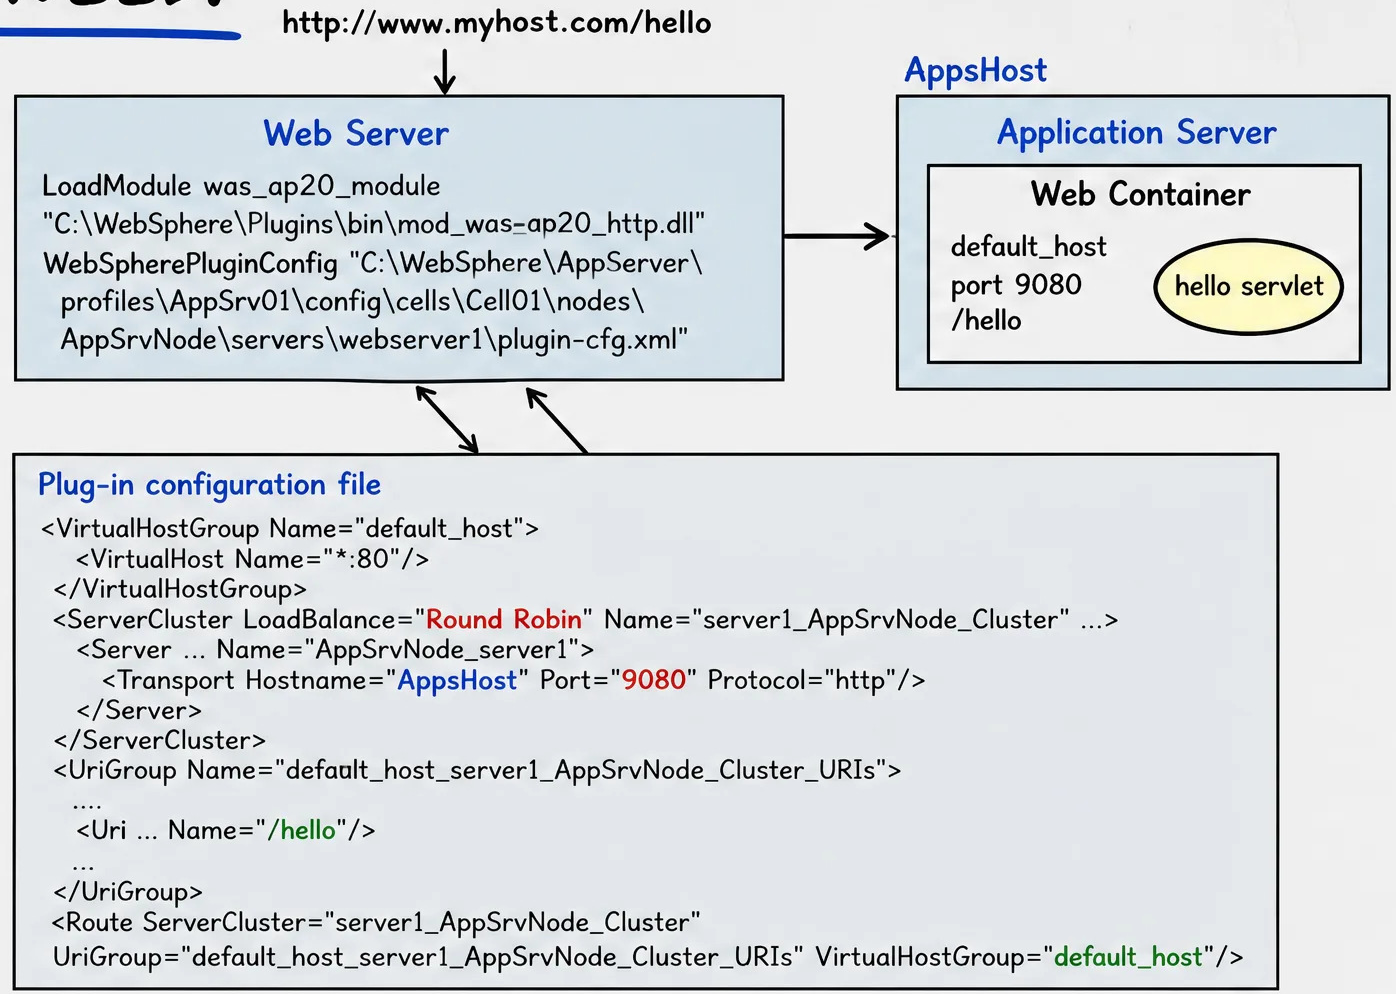

4

Routing is About Control

- ☑ **Control** where users go (virtual host groups)
- ☑ **Control** how load is shared (round robin)
- ☑ **Control** health & availability (server nodes)
- ☑ **Control** what users can reach (URIs & applications)

The right router gives you **control, choices, and confidence.**

Choose the right router. Deliver the right experience. Every time.

5 Memorable Statement

"A Healthy Route is More Important than a Busy Route."

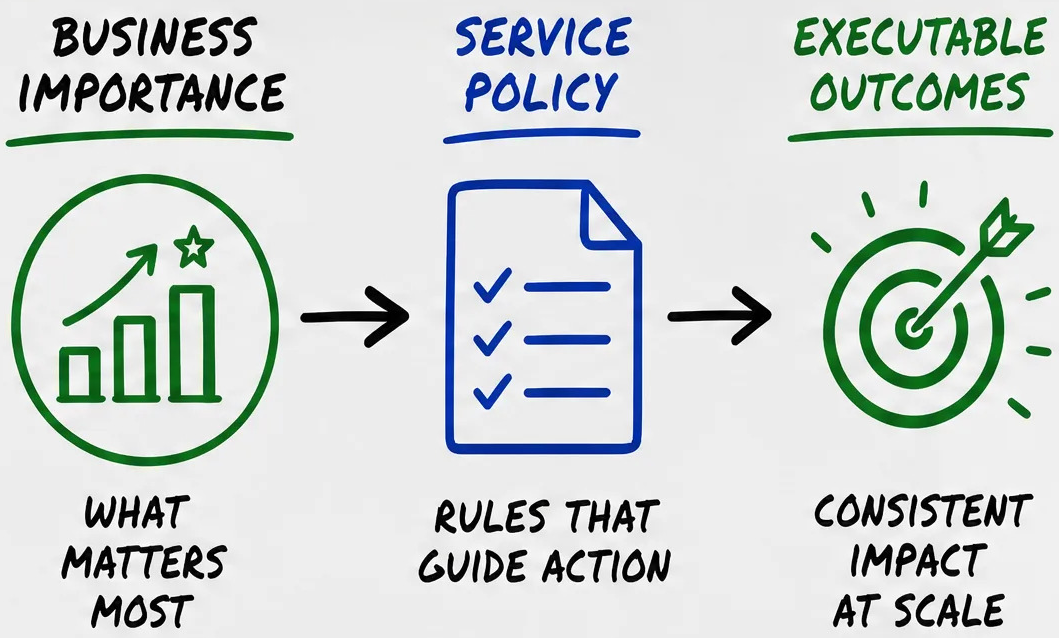

Choose Routes that Sustain Long-term Growth and Adaptability.

6 Service Policy Masterclass

Memorable Statement

> "A Service Policy makes **Business Importance** executable."

→ Policy connects **Strategy** to **Action.**

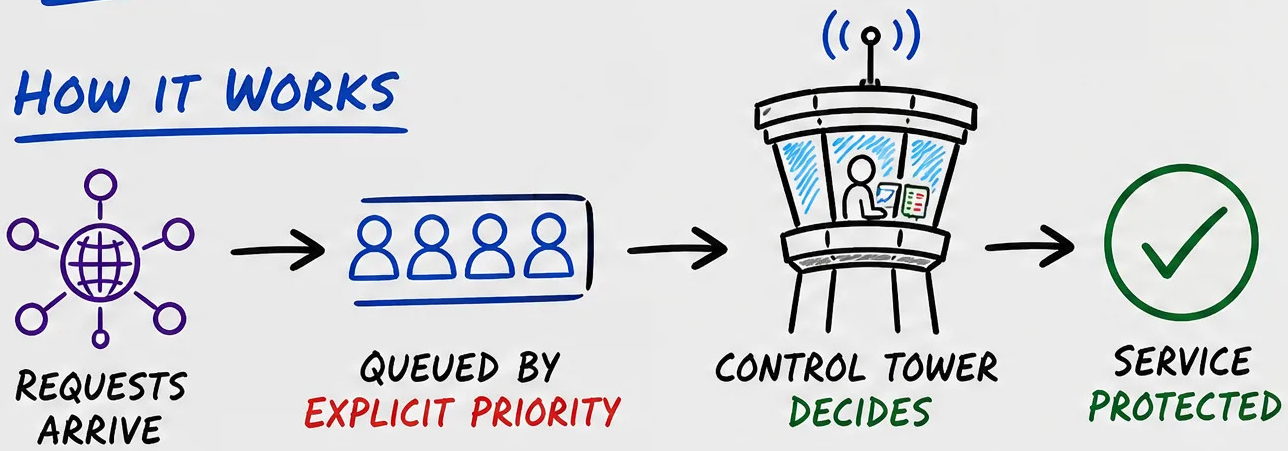

7 Master Class

Queues can Protect Service when Priorities are Explicit.

Protect
Manage
Deliver

How it Works

Benefits

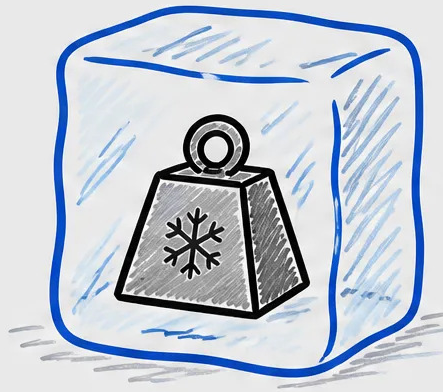

- ✓ Reduces overload
- ✓ Prevents chaos
- ✓ Protects key services
- ✓ Builds trust

☆ Explicit priorities. Protected service. Better outcomes.

8 Capacity Truth

Static Weights FREEZE Yesterday's Capacity ASSUMPTIONS.

Static Weights (Yesterday)

- ✗ Assumes fixed capacity
- ✗ Ignores change

Dynamic Weights (Today & Beyond)

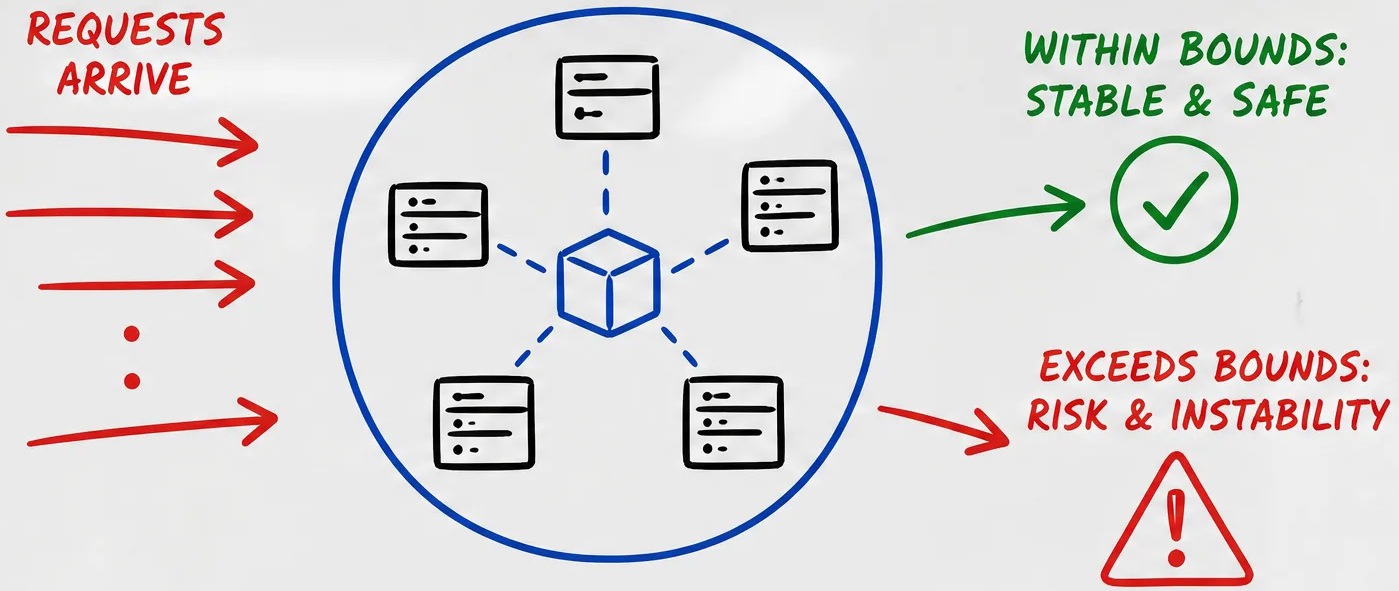

- ✓ Reflects real-time signals
- ✓ Adapts to change

Dynamic Operations turns load into a managed DECISION.

9 MASTERCLASS: DYNAMIC CLUSTERS

A DYNAMIC CLUSTER IS ONLY AS SAFE AS ITS CAPACITY BOUNDS.

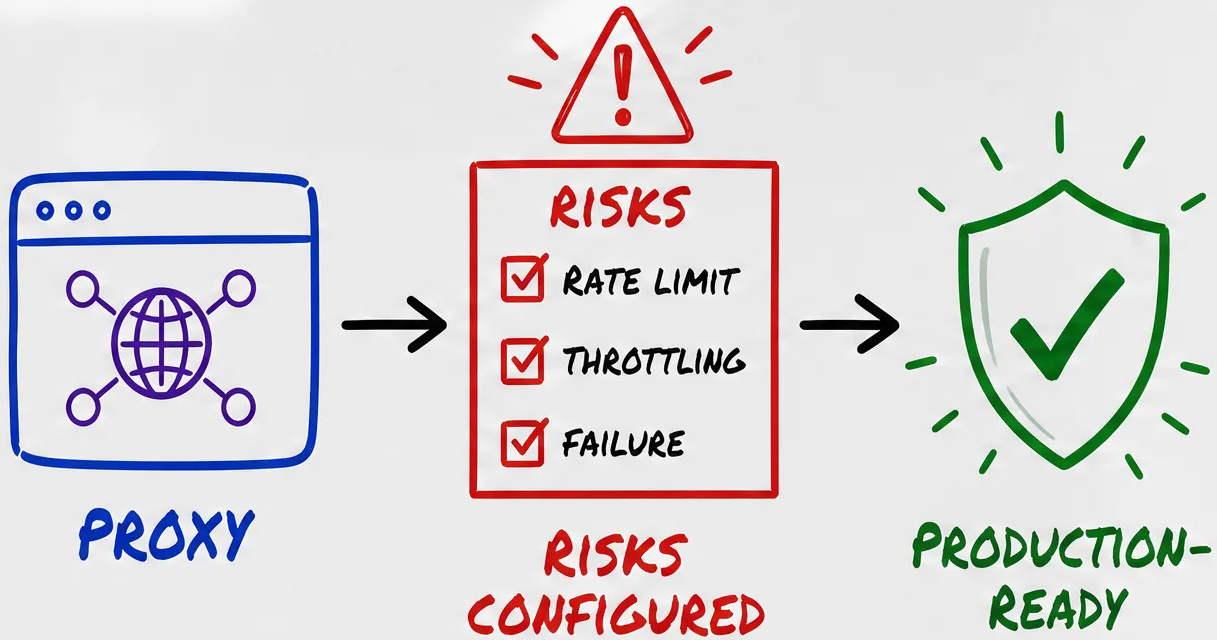

CAPACITY BOUNDS DEFINE SAFETY

- RESPECT LIMITS
- OBSERVE CONSTANTLY
- ACT BEFORE IT HURTS

DYNAMIC OPERATIONS TURNS LOAD INTO A MANAGED DECISION.

10 MASTERCLASS TAKEAWAY

"A PROXY IS **PRODUCTION-READY** ONLY AFTER ITS **RISKS** ARE CONFIGURED."

CONFIGURE RISKS. DELIVER RELIABILITY. EARN TRUST.

11 Masterclass: Configuration That Protects

Configuration Success is NOT Runtime Success.

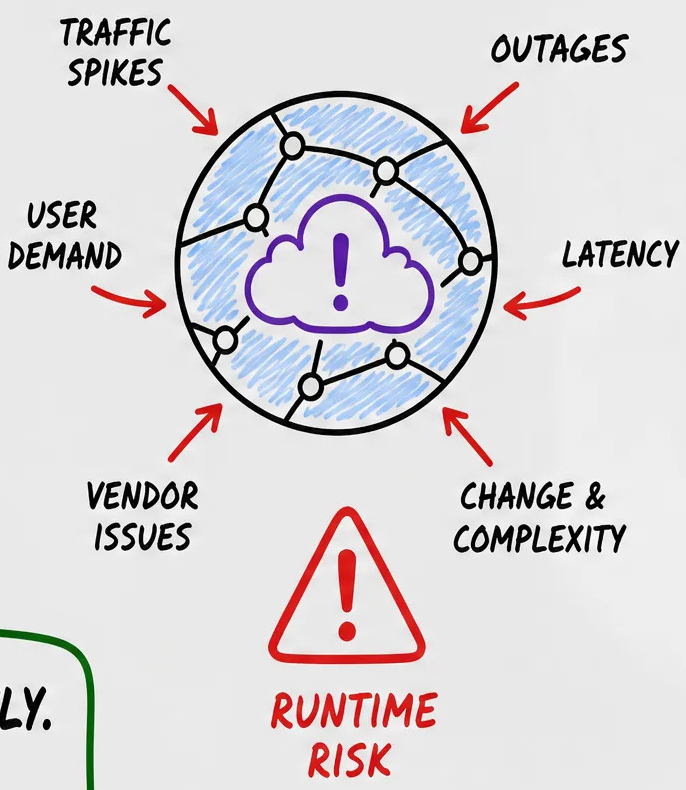

CONFIGURATION

- ☑ SETTINGS
- ☑ POLICIES
- ☑ CONNECTIVITY
- ☑ ACCESS

→

✓ CONFIG SUCCESS

RUNTIME REALITY

Configure well. Validate continuously.
Operate confidently.

Enable Dynamic Web-Server Routing Safely

1. Protect IM Settings
2. Enable IM — ON
3. Generate and Propagate Plug-in
4. Restart Web Server

Preserve Discovery Before Deployment

Certificate / Key

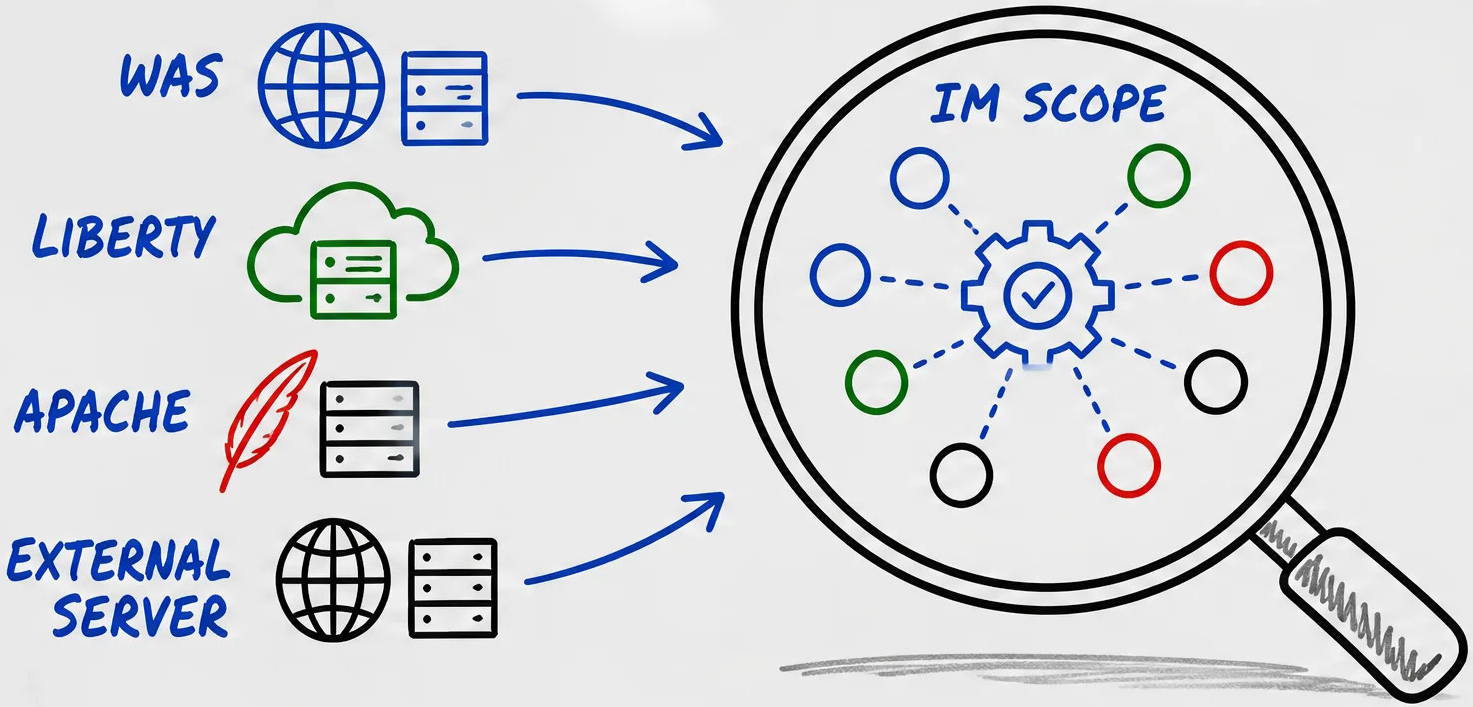

- Secure Private Key
- Protect and Backup
- Required for Plug-in Generation

REST Endpoints

- GET /im/web/routing/discovery
- POST /im/web/routing/plugin
- POST /im/web/routing/restart
- GET /im/web/routing/status

Generate and Propagate ONLY AFTER Protecting IM Settings.

Model Heterogeneous Middleware, Then Check Lifecycle

Model First; Automate Only Where Supported

DEPRECATED
ASSISTED LIFECYCLE
LIMITED OR NO FUTURE SUPPORT

Representation Does Not Guarantee Full Lifecycle Control.

Health Policies:

Detection with Deliberate Reactions

Health Signals

- Response Time
- Heap
- Garbage Collection
- Timeouts
- Age

Detect the Condition You Can Defend

Policy Card

- ✓ Condition
- ✓ Threshold
- ✓ Impact
- ✓ Priority
- ✓ Action Plan

Action Gates

Supervised Action

- ✓ Human in the loop
- ✓ Approve & act

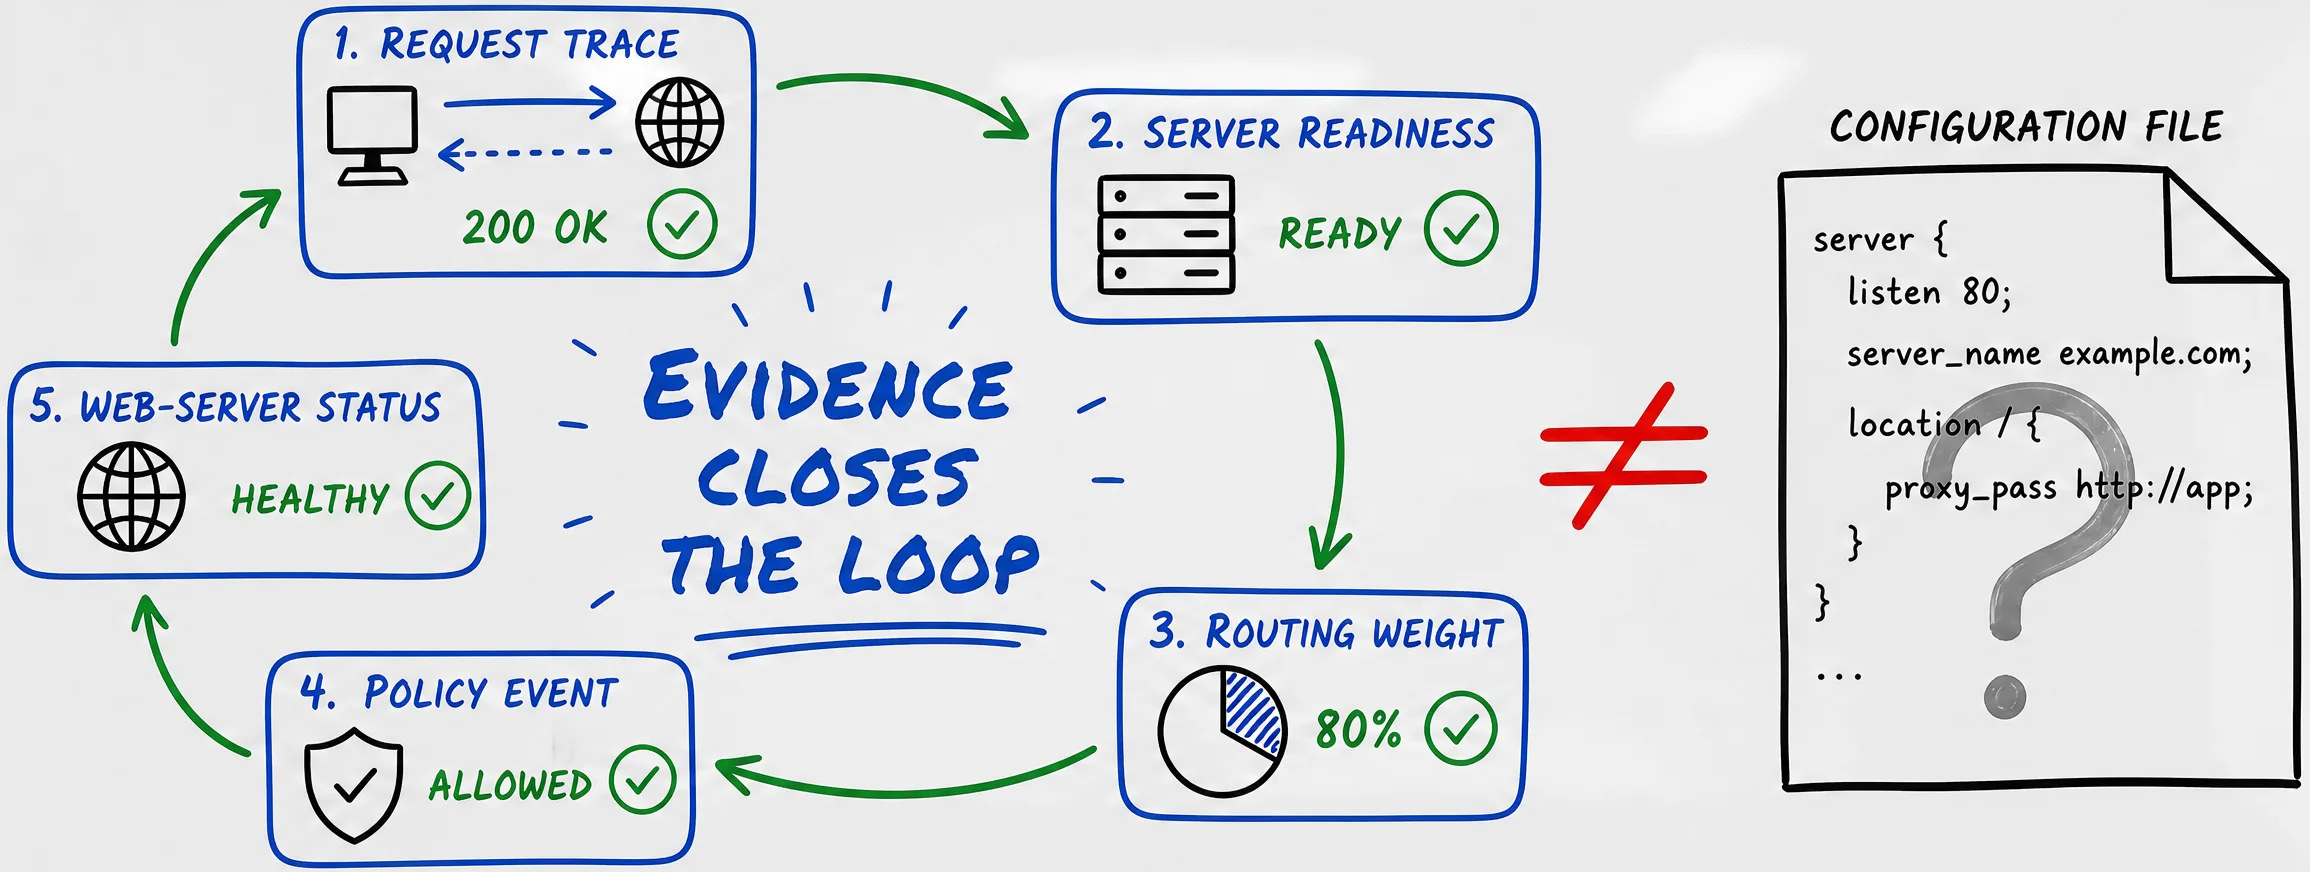

Automatic Action

- ✓ Pre-approved
- ✓ Auto execution

Memorable Statement:

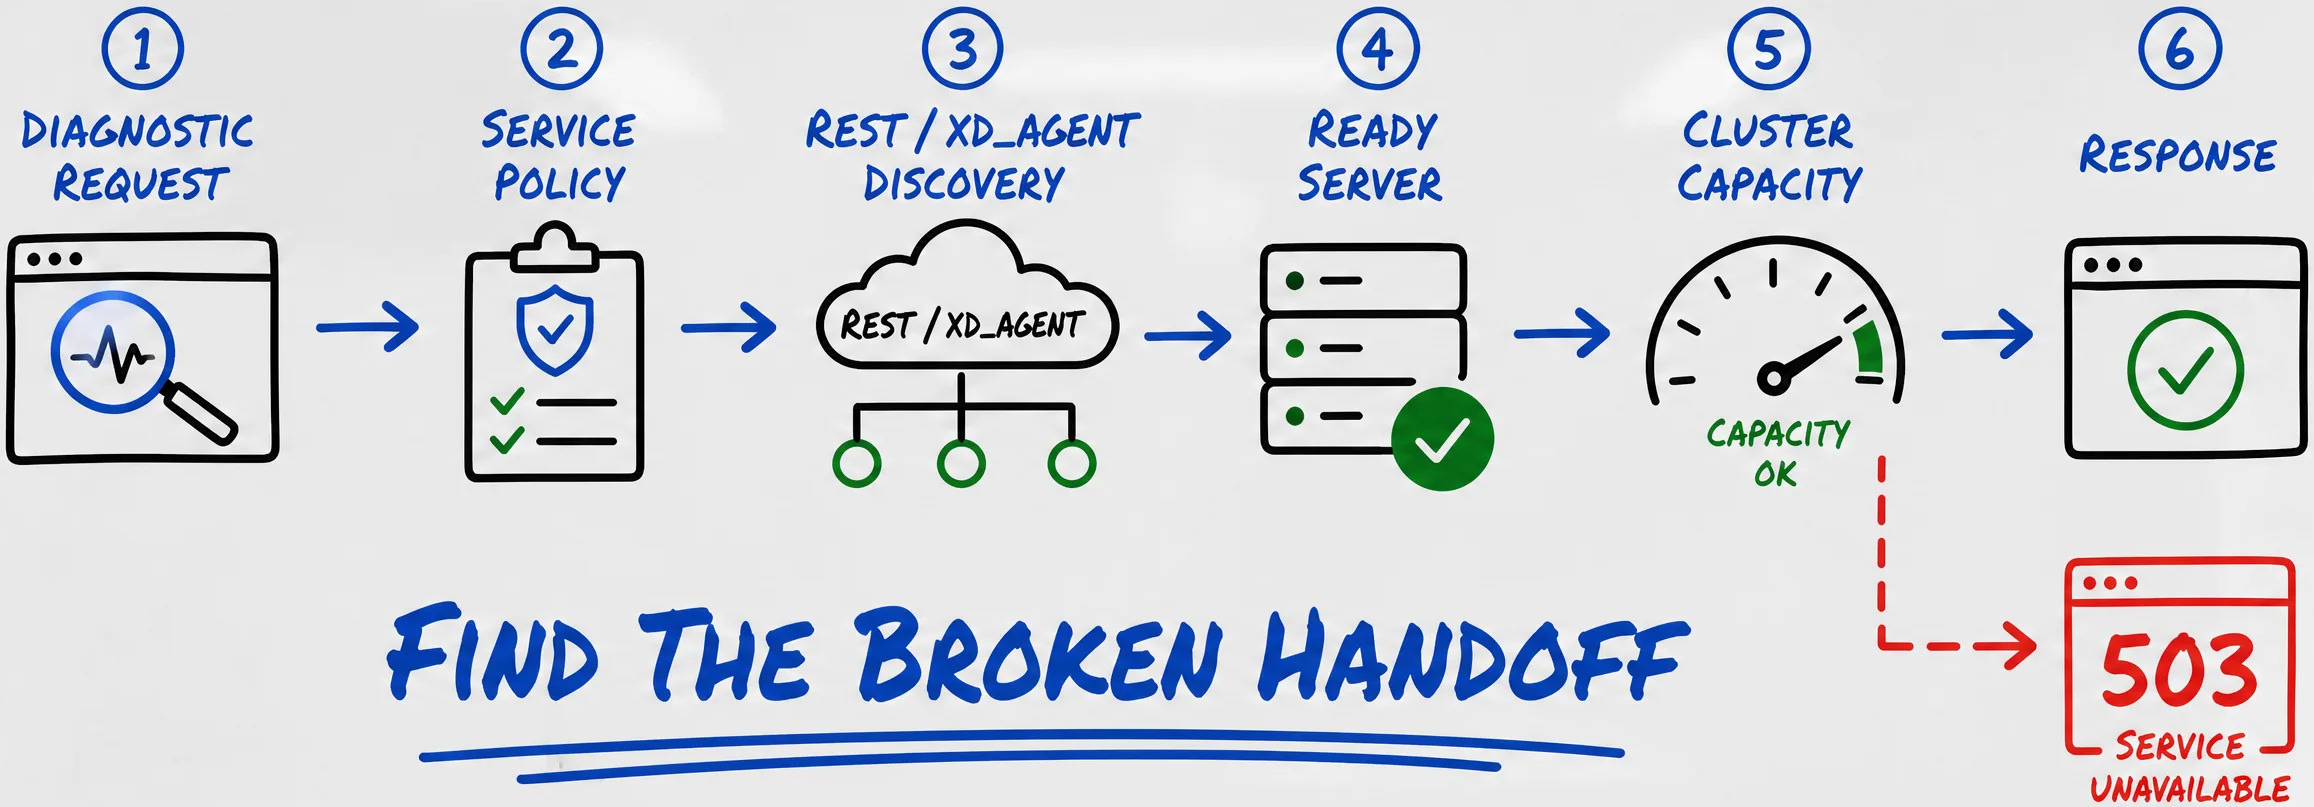

A threshold without an action plan is **only an alarm.**

Verify Behavior, Not Just Configuration

A saved configuration is **NOT** a **verified behavior.**

Troubleshoot Dynamic Routing in Order

Find The Broken Handoff

Routing failures are usually **a chain**, **not a single setting.**

Version Drift: Choose the supported path

V9.0.5
INTELLIGENT MANAGEMENT RETAINED

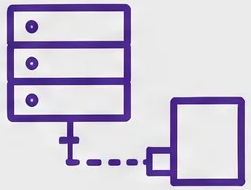

DEPRECATED
ASSISTED LIFECYCLE POINTS LIBERTY TO COLLECTIVE

PLUG-IN
REMAINS SUBSET

Modernize with Precise Language

POINTS LIBERTY TO COLLECTIVE

POINTS TO SIP PROXY

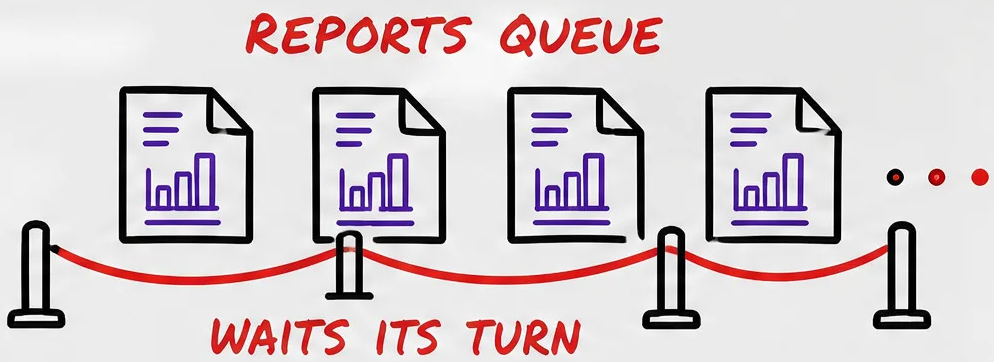

Deprecation is a migration decision, not a guessing game.

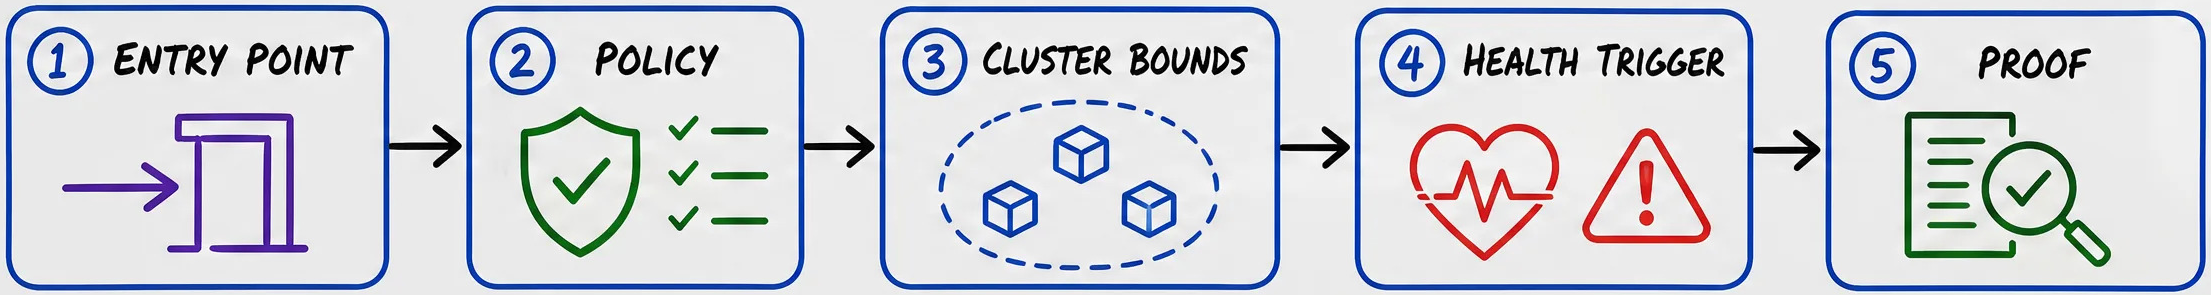

Lab: Protect the Checkout Path

18

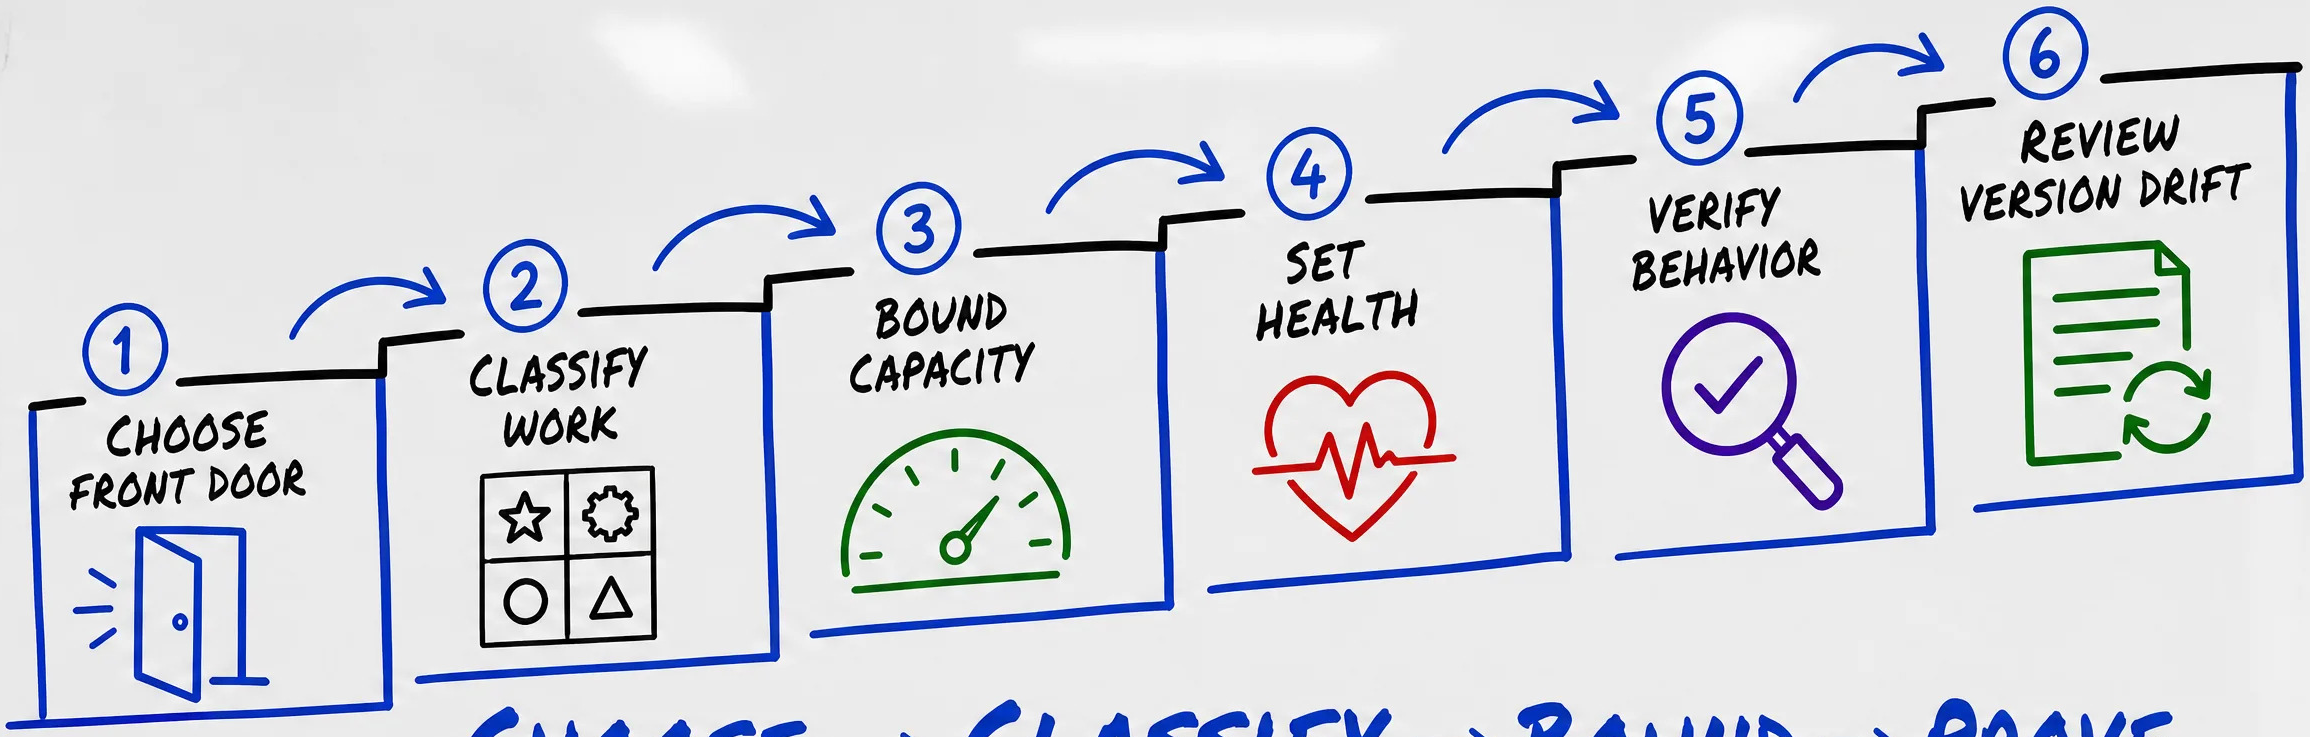

Design, Test, Explain

A lab is complete when the evidence matches the policy.

Recap: The Dynamic Operations Playbook

Choose → Classify → Bound → Prove

Dynamic Operations earns trust through **measurable** behavior.
