WebSphere v9 Administration: Module 3

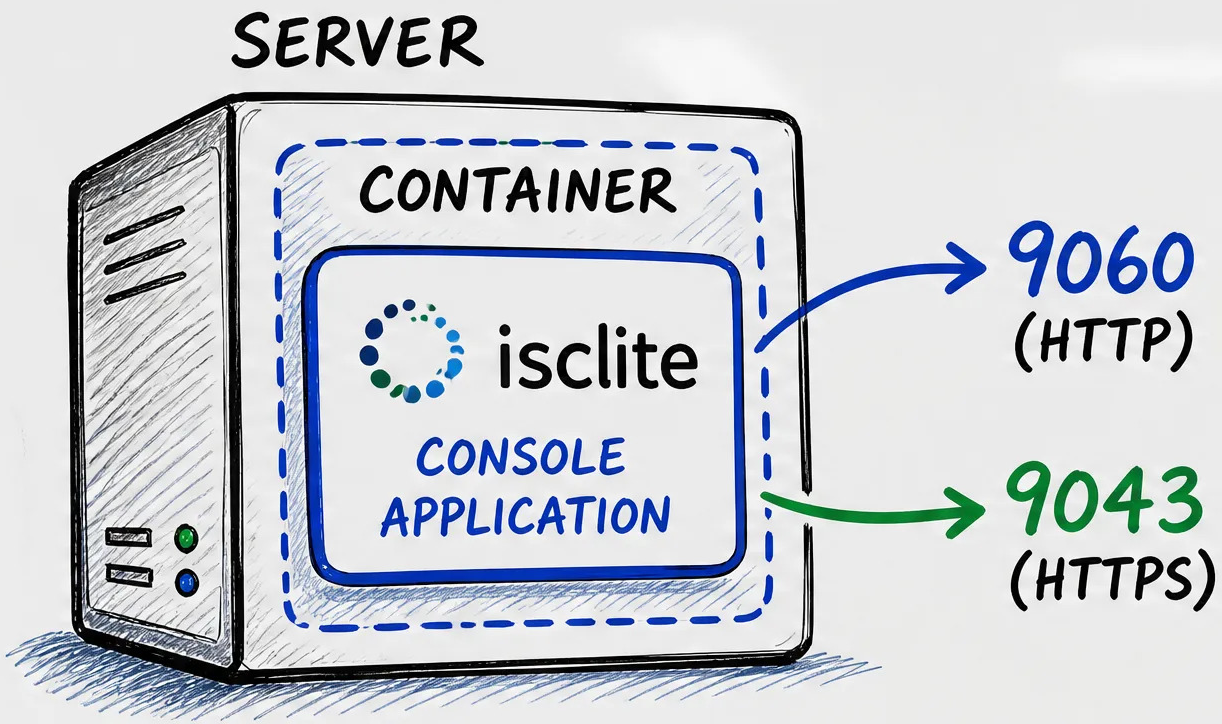

Dr. Lee

The Administrative Console

The console is a translator between human intent and machine configuration.

What the Console Actually Is

An App Managing the House

The tool managing the server is subject to the same rules as the server.

Your Uncommitted Anchor

Your **login identity** is your **workspace anchor.**

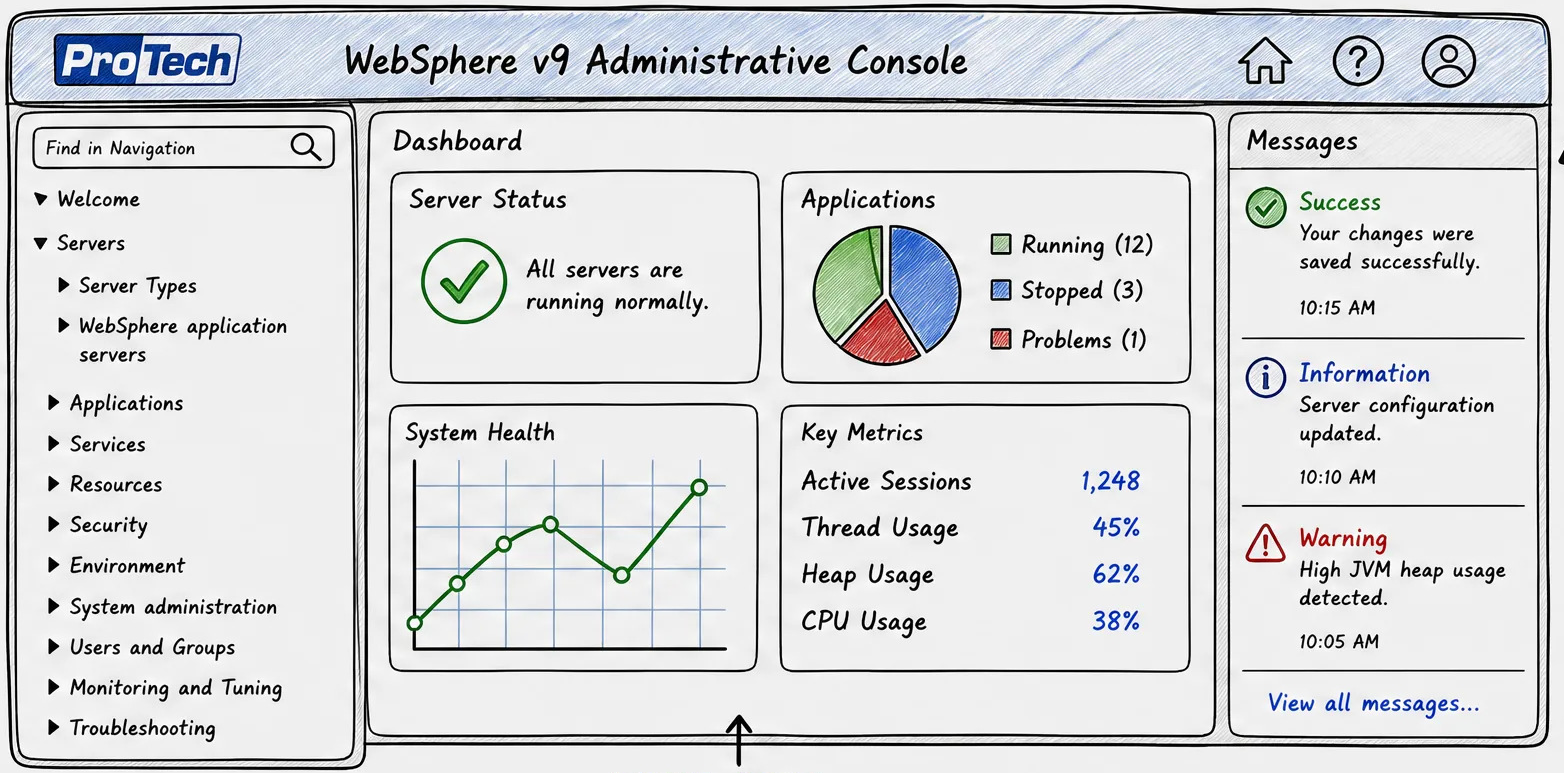

Console Navigation

Banner

Global title, branding, and quick access tools.

Navigation Tree

Hierarchical menu structure for navigating console features and tasks.

Messages

System messages, alerts, and notifications keep you informed.

Work Area

Primary content area where information and tasks are displayed and managed.

The Dashboard Layout

Predictability breeds speed—once you know the layout, you can drive any profile.

Command Assistance

Dr. Lee

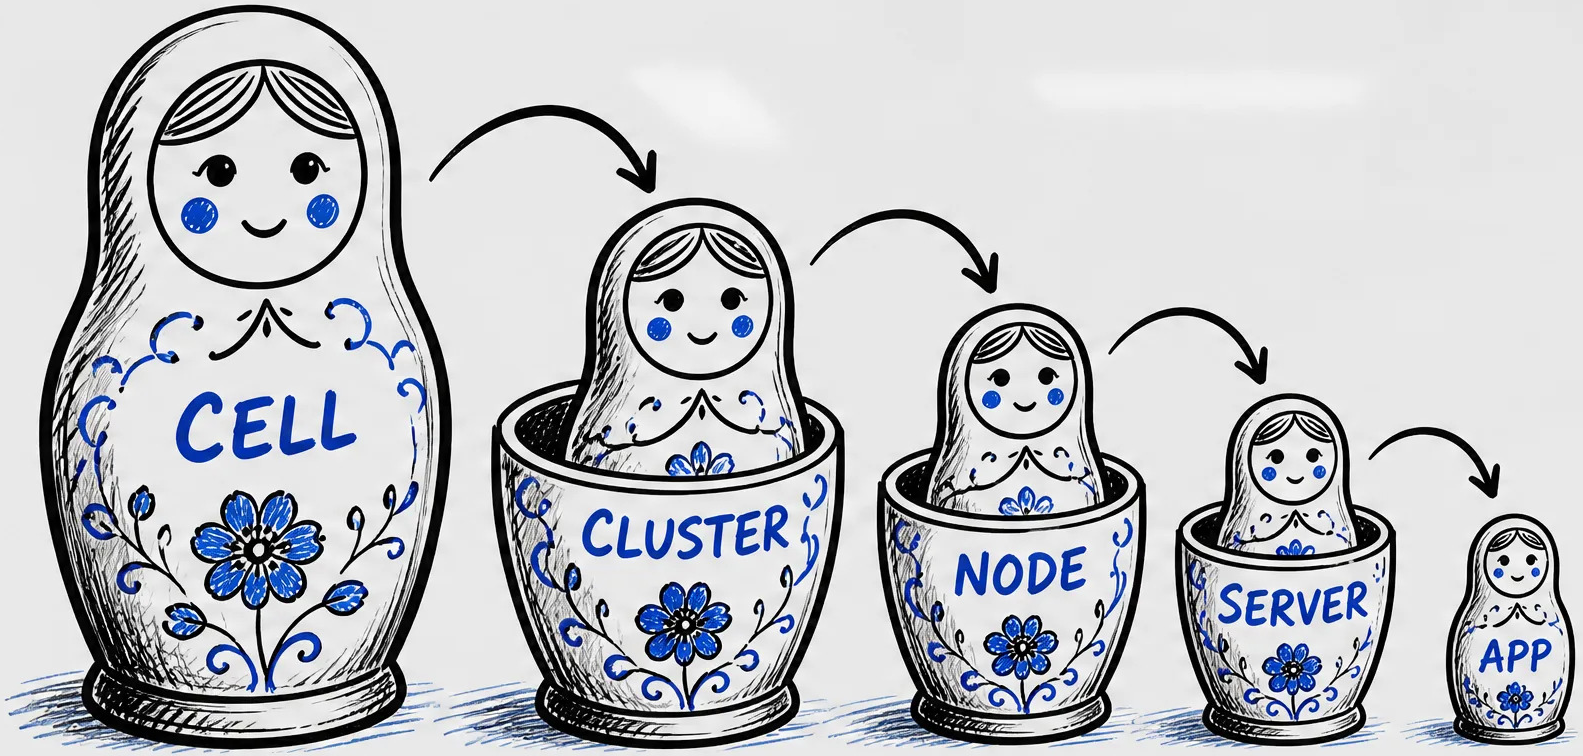

Click to Script

WSADMIN (JYTHON) SCRIPT

```
AdminConfig.save()
server = AdminConfig.list(
   'Server', '*')
for s in server:
    print AdminConfig.show(s)
AdminApp.view('server', s)
```

The console is the best scripting instructor you will ever have.

Configuration Scope

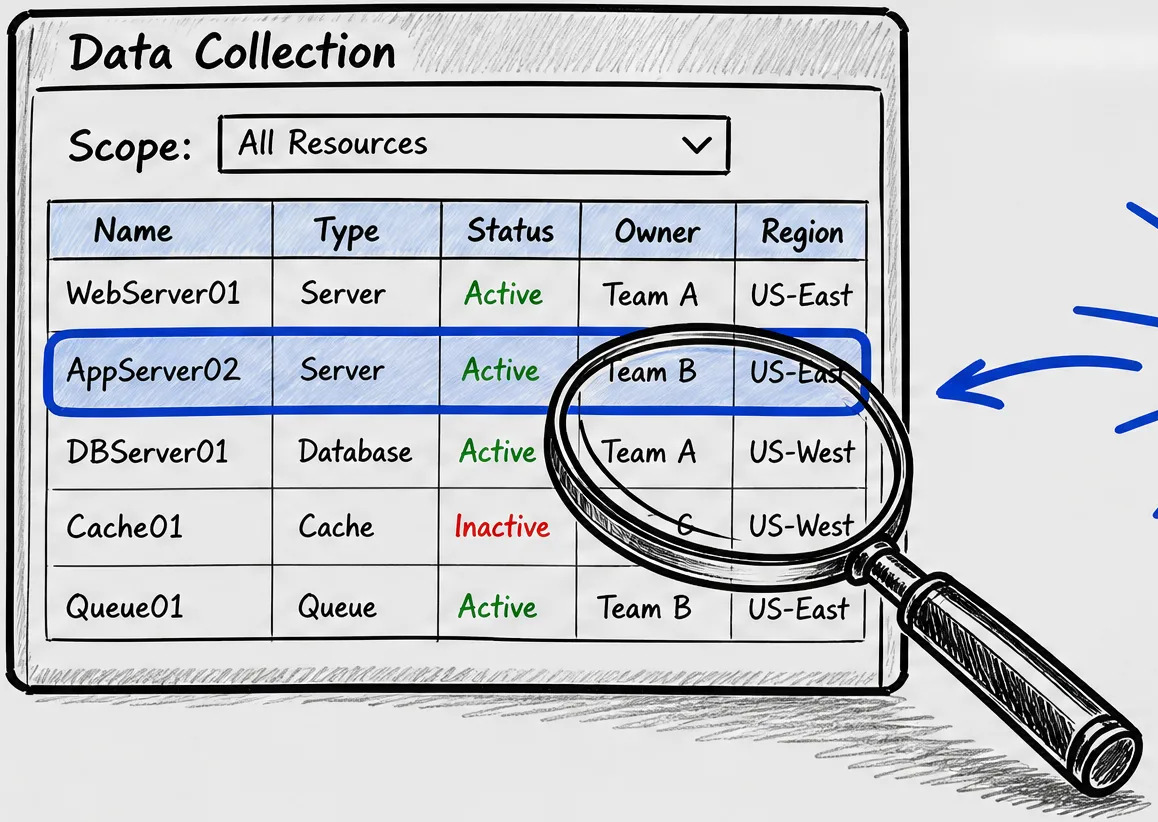

Hierarchy of Rules

Specificity overrides **generality**—
the most localized configuration **always wins.**

Working with Scope in the UI

Dr. Lee

Focus the Glass

You must declare your target before you build the resource.

The Save Lifecycle

WORKSPACE

(Draft / In Progress)

- ✓ Ideas
- ✓ Edits
- ✓ Experiments

SAVE

Drafts and Masters

MASTER REPOSITORY

(Final / Trusted / Locked)

- ✓ Finalized
- ✓ Tracked
- ✓ Reliable
- ✓ Recoverable
- ✓ Trusted

A change isn't real until it hits the master repository.

Securing the Console

Dr. Lee

The Perimeter Gate

AUTHENTICATION
Who are you?
Verify identity.

AUTHORIZATION
What are you allowed to do?
Validate permissions.

Without administrative security, anyone with the URL owns the server.

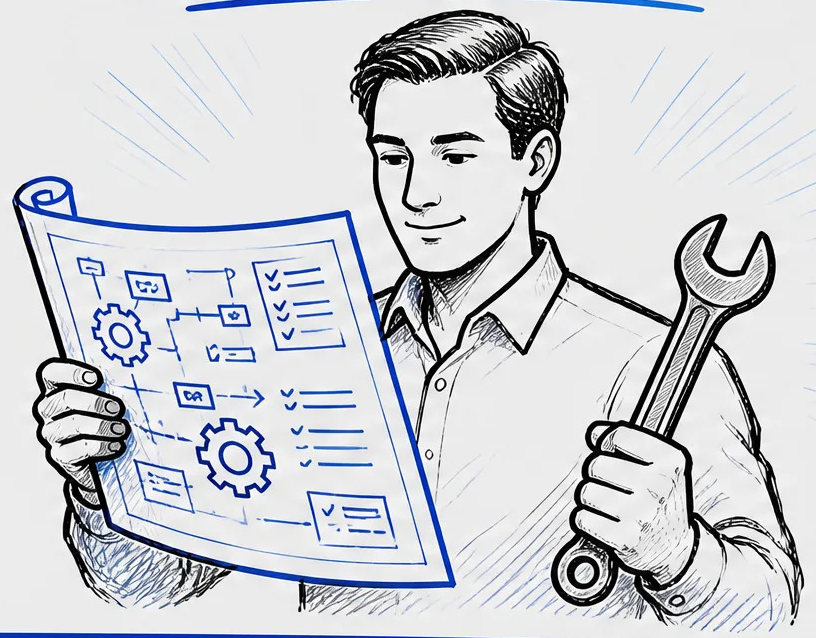

Roles: Monitor & Configurator

MONITOR

Eyes vs. Hands

CONFIGURATOR

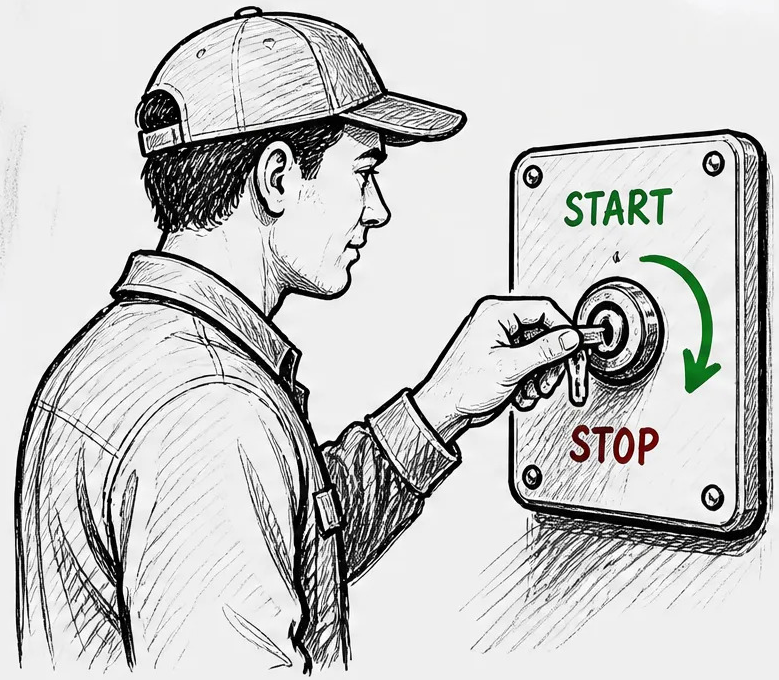

The Configurator builds the engine but doesn't turn the key.

Roles: Operator & Administrator

Dr. Lee

OPERATOR

Ignition vs. Master Key

ADMINISTRATOR

The Administrator holds the master keys to the cell.

ProTech

Specialized Roles

Dr. Lee

DEPLOYER

AUDITOR

SEPARATION OF DUTIES

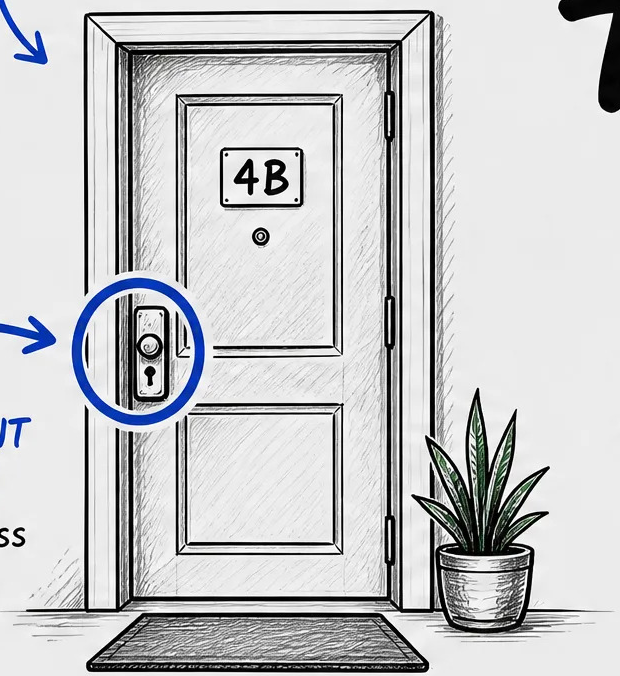

ADMIN SECURITY MANAGER

Specialized roles enforce separation of duties.

Fine-Grained Security

SINGLE APARTMENT DOOR

APARTMENT KEY (4B)

Grants access only to this apartment.

Targeted Access Control

MASTER BUILDING KEY

MASTER KEY

Grants access to all apartments in the building.

Fine-grained security limits **blast radius**.

Guided Activities & Dashboards

Dr. Lee

GUIDED ACTIVITY

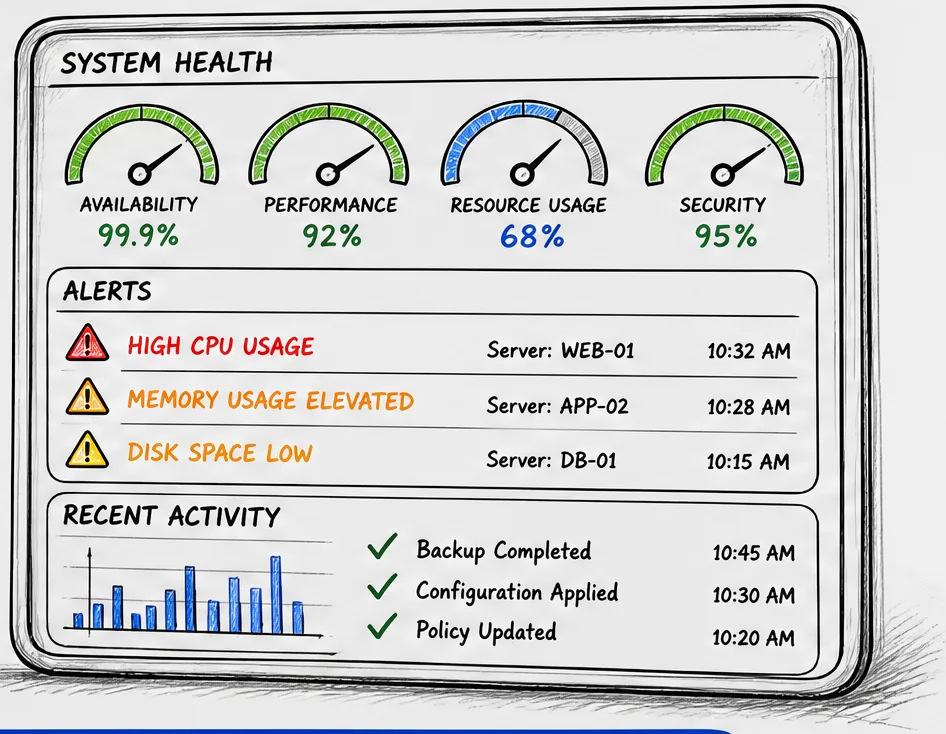

Step-by-step guidance to stay on track.

Intelligence at a Glance

DASHBOARD

Monitor health, performance, and risks in real time.

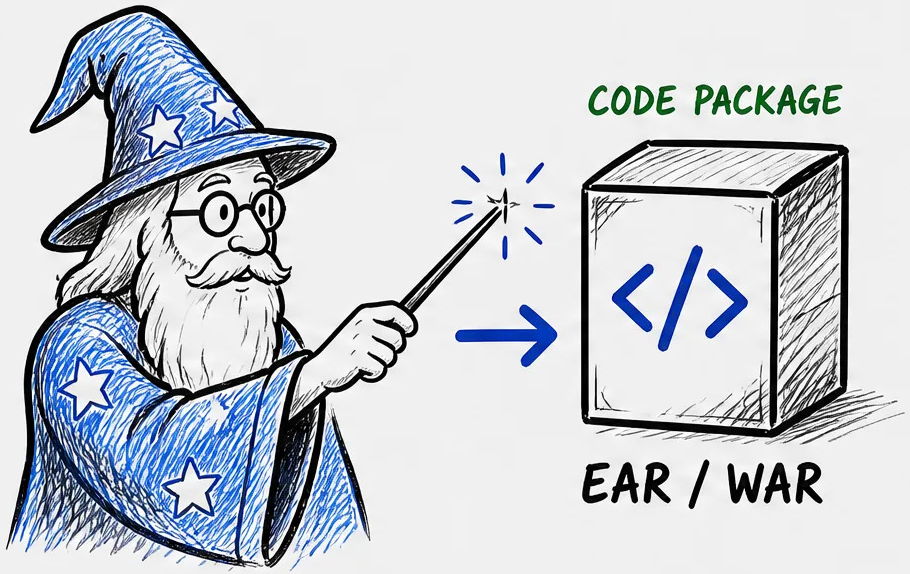

The console doesn't just show data; it surfaces insight.

Adding Middleware & Apps

Dr. Lee

APPLICATION WIZARD

CODE PACKAGE

EAR / WAR

Deploying the Workload

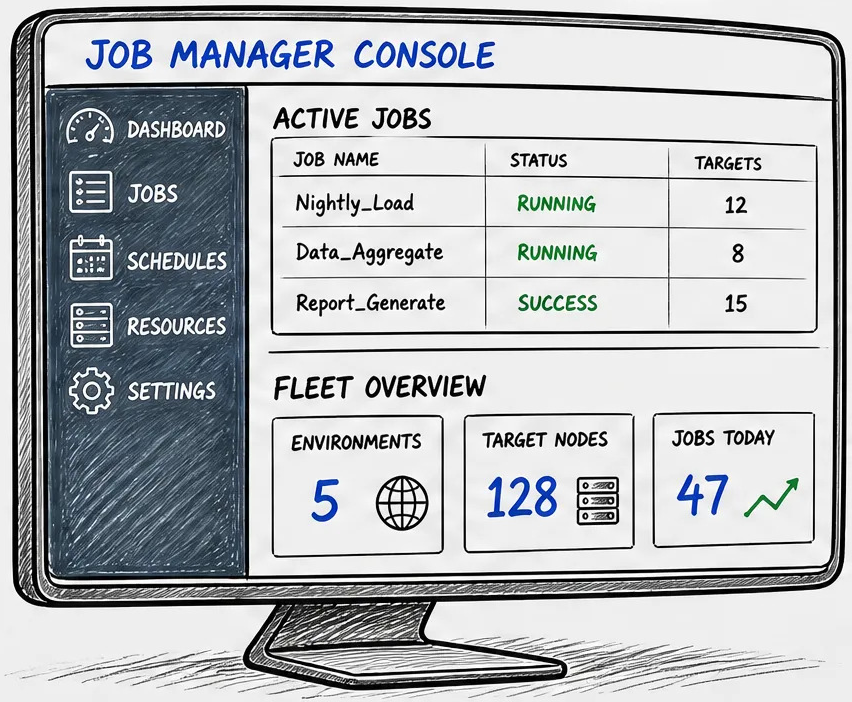

TARGET SERVER NODE

SPECIFIC SERVER NODE

Deployment is a mapped contract between the code and the infrastructure.

The Job Manager Console

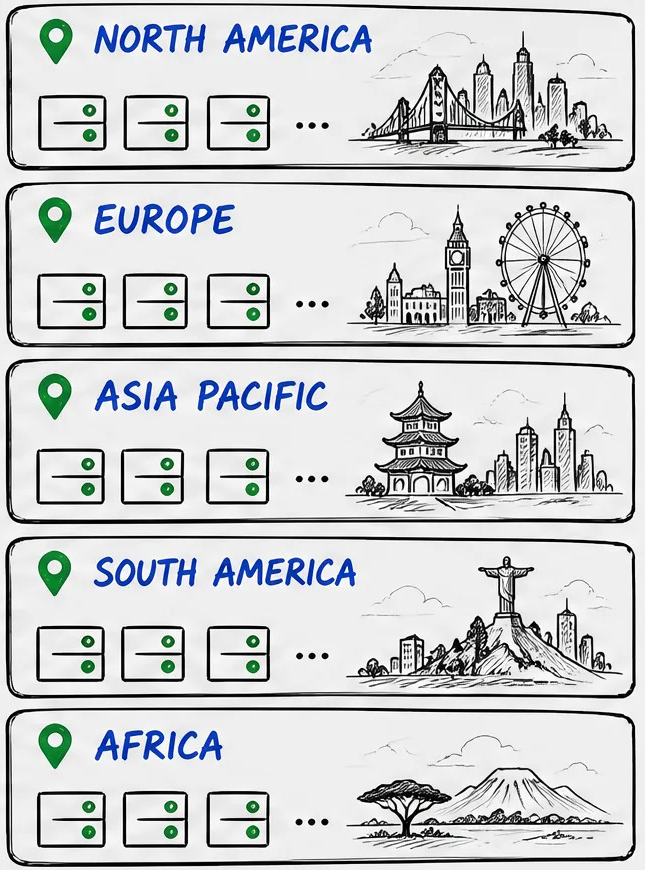

Orchestrating the Fleet

DISPATCH SCRIPTS

DEPLOY APPS

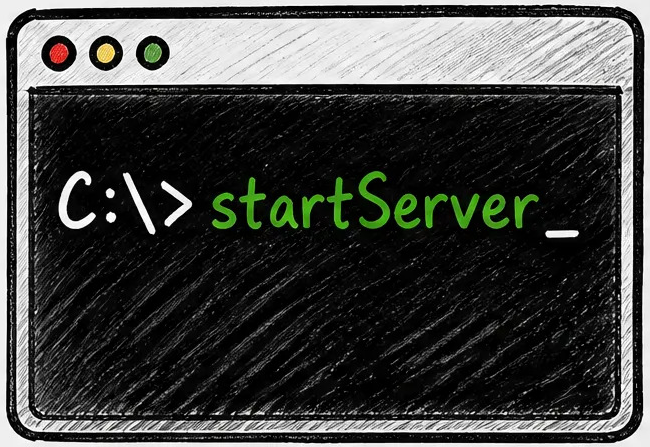

EXECUTE JOBS

GEOGRAPHIC ENVIRONMENTS

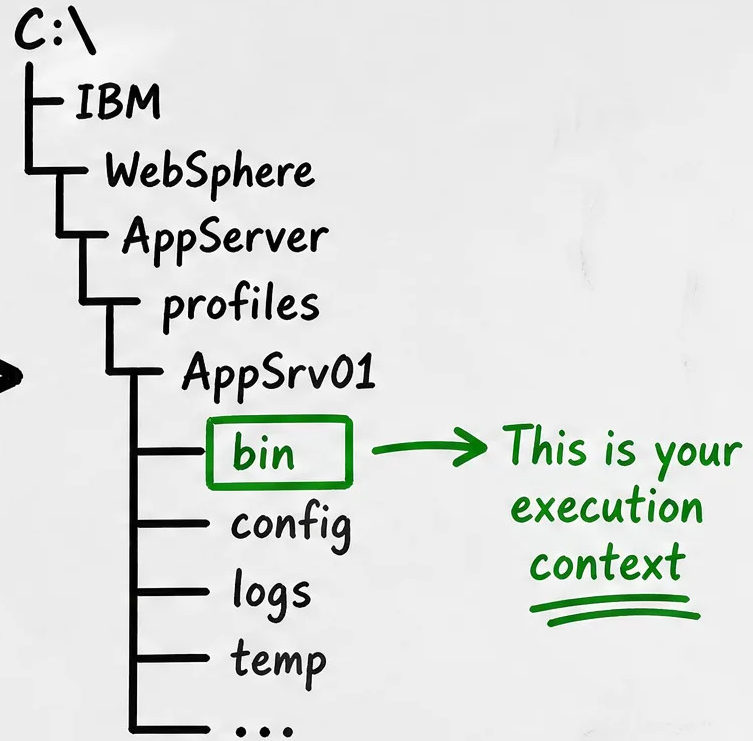

The Job Manager coordinates the fleet.

Command Line Review

Execution Context

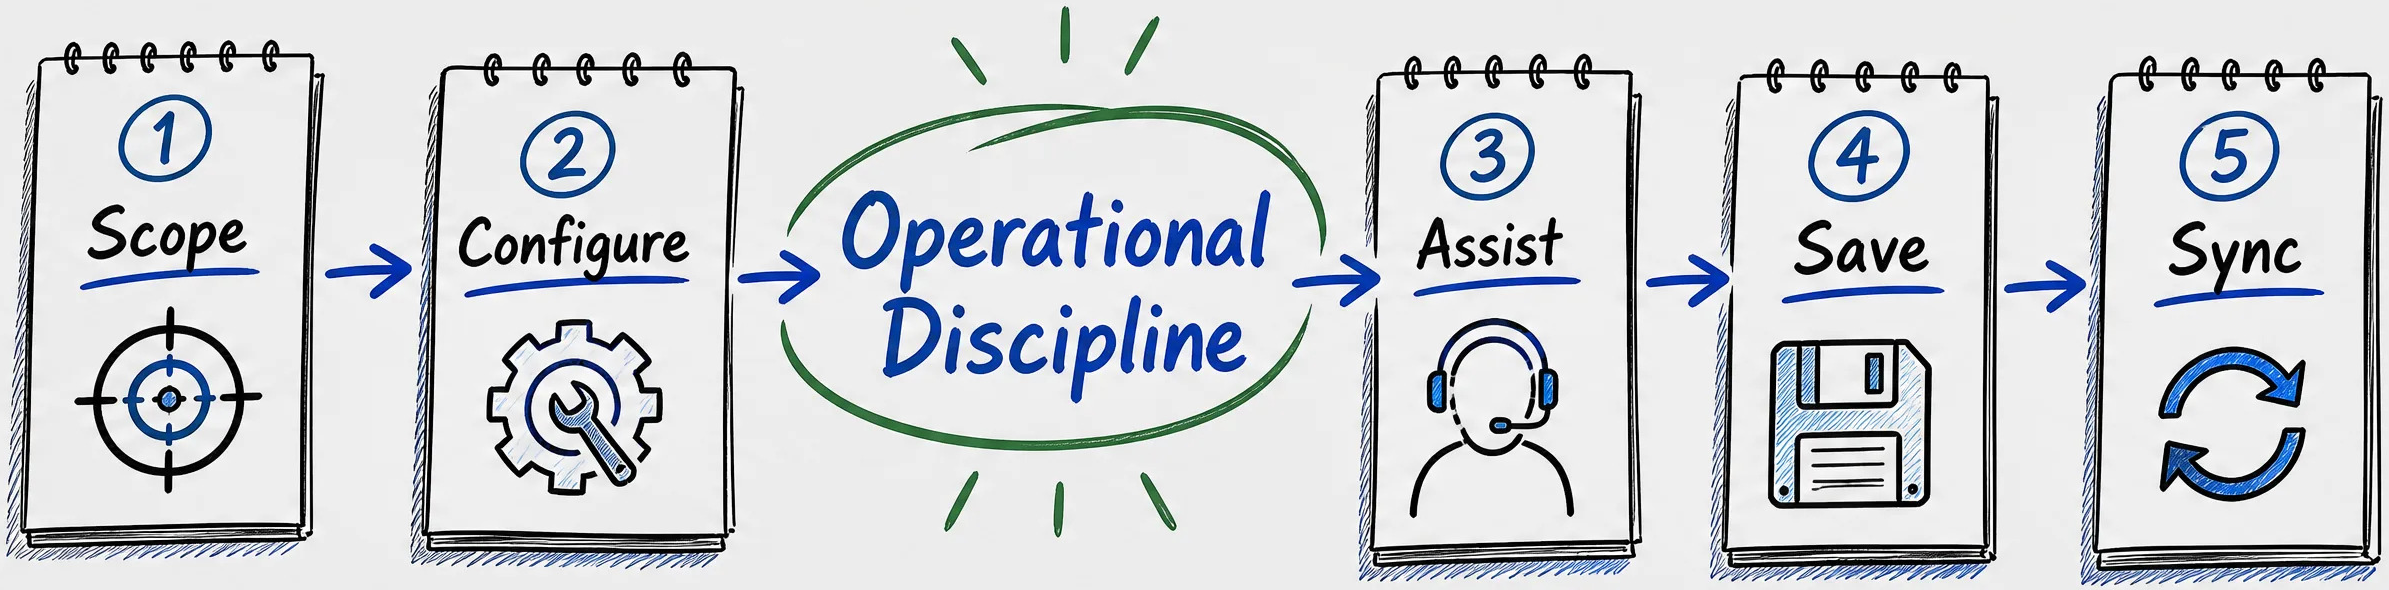

Context is everything when you leave the GUI.

Module 3 Summary

Dr. Lee

Discipline in the console guarantees stability in the runtime.
