WebSphere Installation Automation

MANUAL INSTALLS

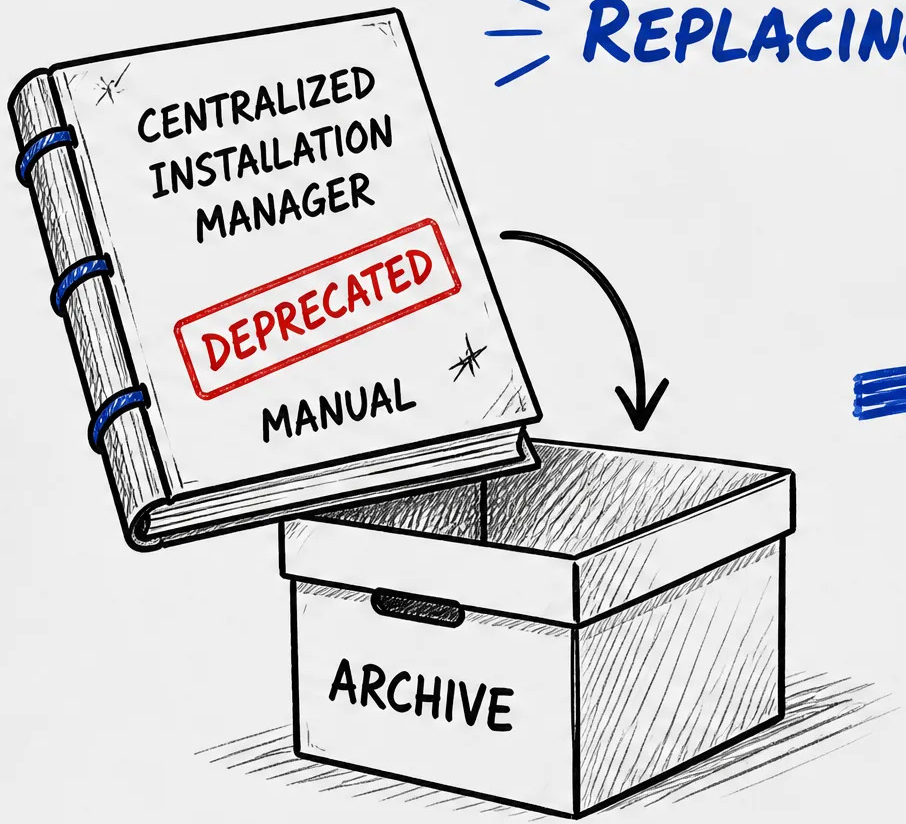

AUTOMATED PIPELINES

MANUAL INSTALLATIONS ARE SNOWFLAKES;
AUTOMATED INSTALLATIONS ARE FACTORIES.

The Deprecation of CIM

Replacing Legacy Tools

Modern Scripting Tools

PowerShell

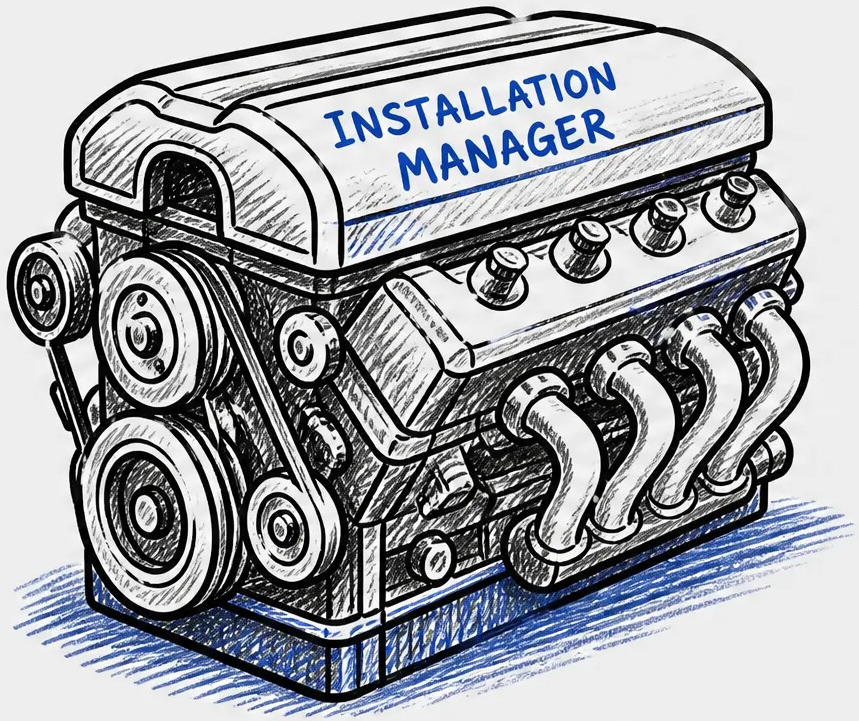

```
# AUTOMATE
Connect-WS
Get-Task
Start-Task
Monitor-Task
Complete-Task
```

Python

</> Automation Frameworks

DO NOT build new automation on **deprecated** technology.

IBM Installation Manager

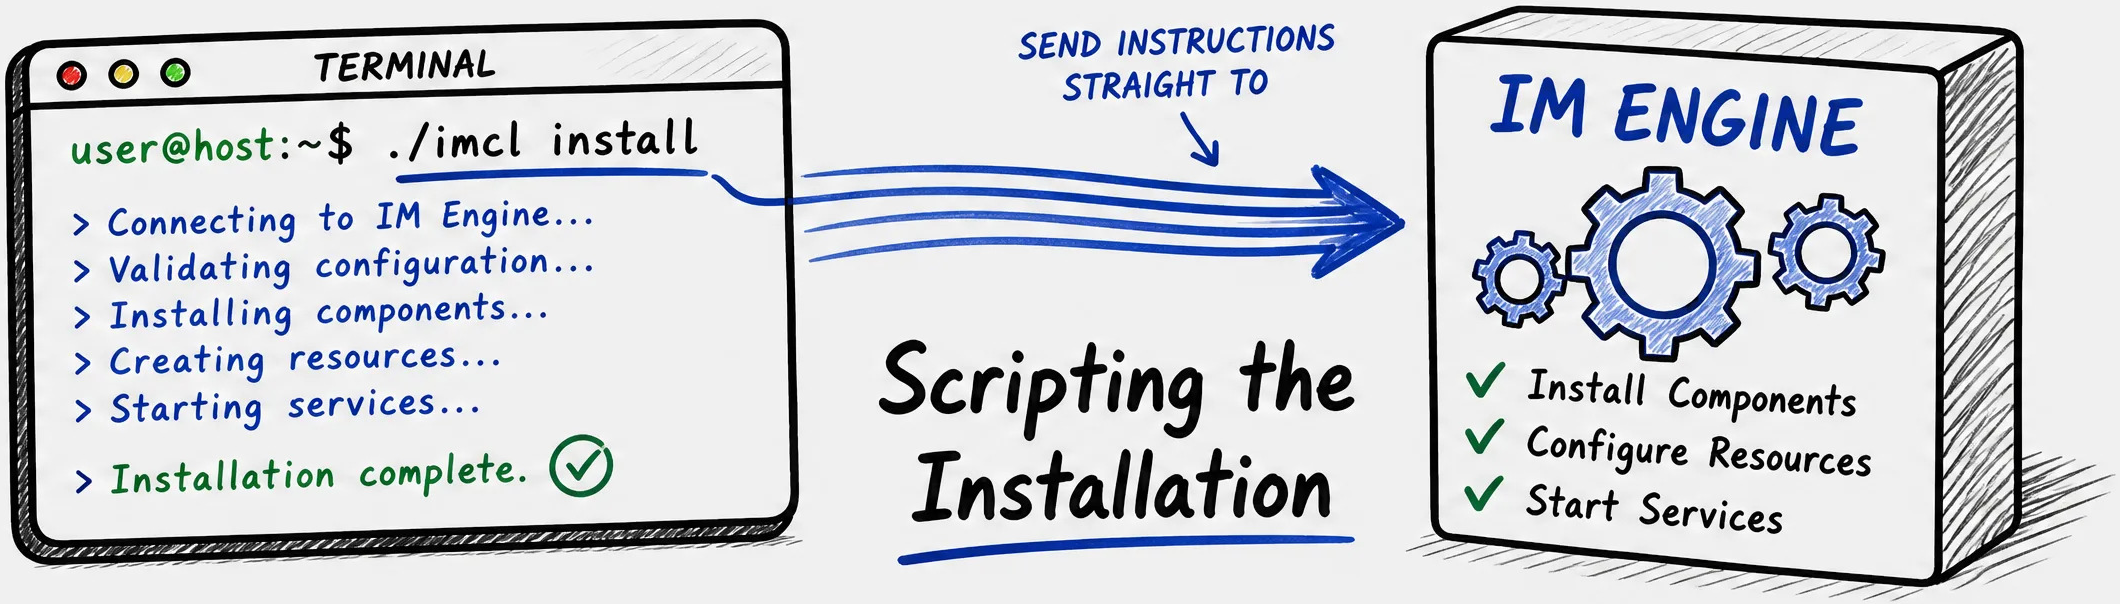

The
COMMON INSTALLER ENGINE

- WebSphere
- HTTP Server
- Java SDK

Installation Manager is the engine;
WebSphere is the payload.

The Command Line: imcl

Scripting the Installation

★ The command line is the gateway to automation.

The Java 8 Separation

Dr. Lee

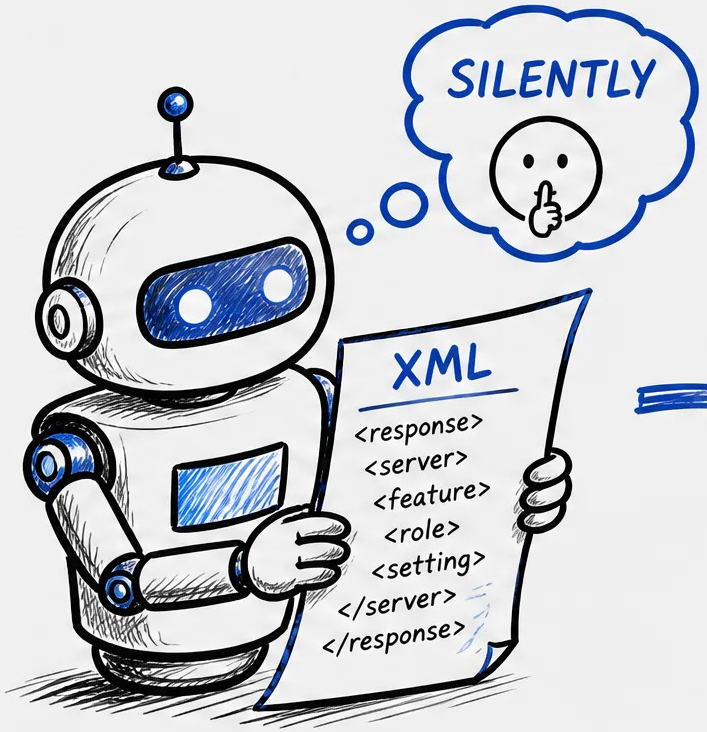

WebSphere requires Java,
but it no longer brings its own.

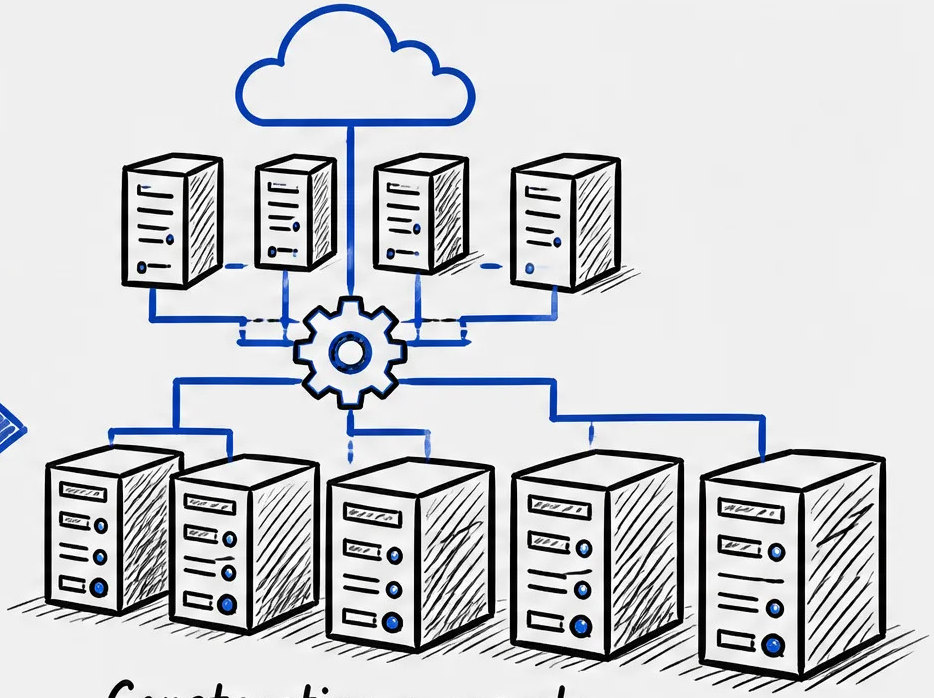

WebSphere and Java SDK 8 are separate pieces that must be *explicitly provided and installed* to run WebSphere.

Silent Installations

ProTech

The XML Response File

Constructing a complex server environment—silently.

A response file is a declarative contract for your server build.

Dr. Lee

Generating Response Files

RECORD

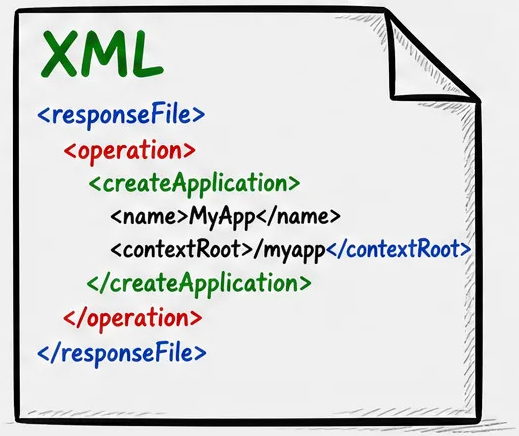

Capture administrator GUI clicks

GENERATE

Instantly generate clean XML script

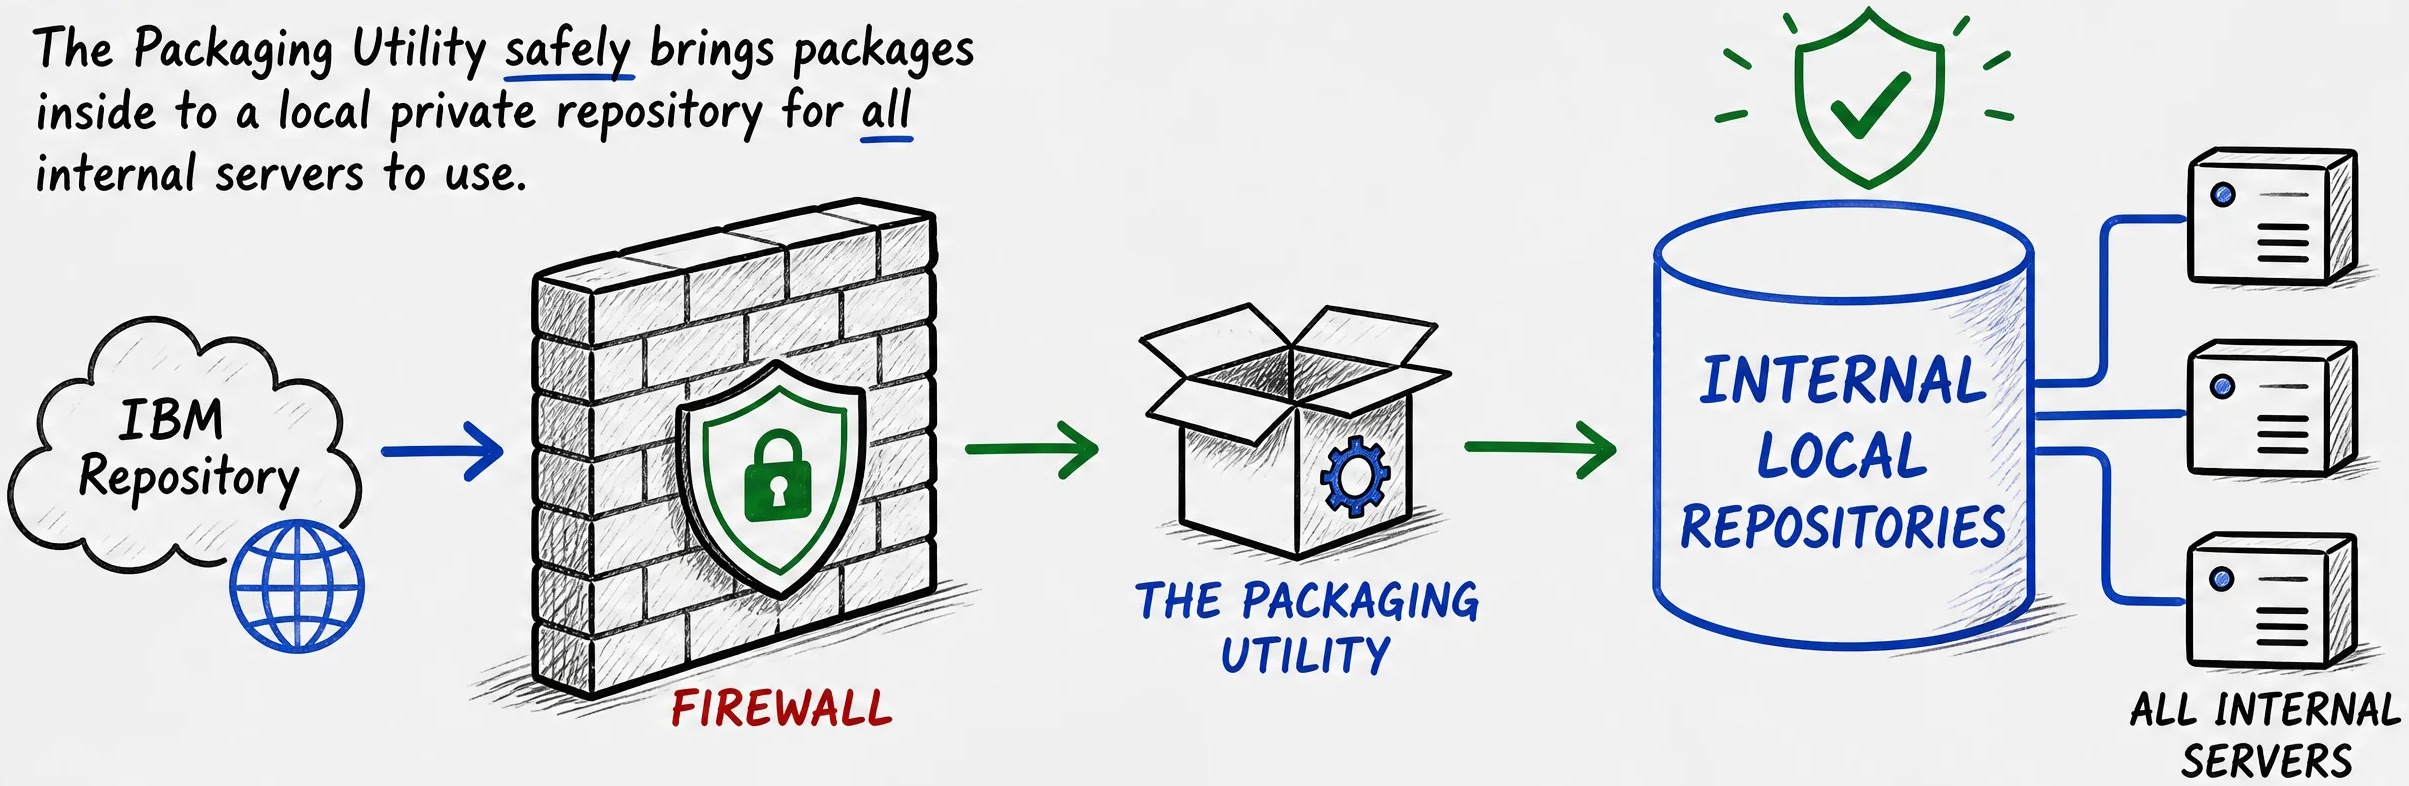

Record Once, Replay Everywhere

MEMORABLE STATEMENT: Record once, replay everywhere.

The Packaging Utility

The Packaging Utility safely brings packages inside to a local private repository for all internal servers to use.

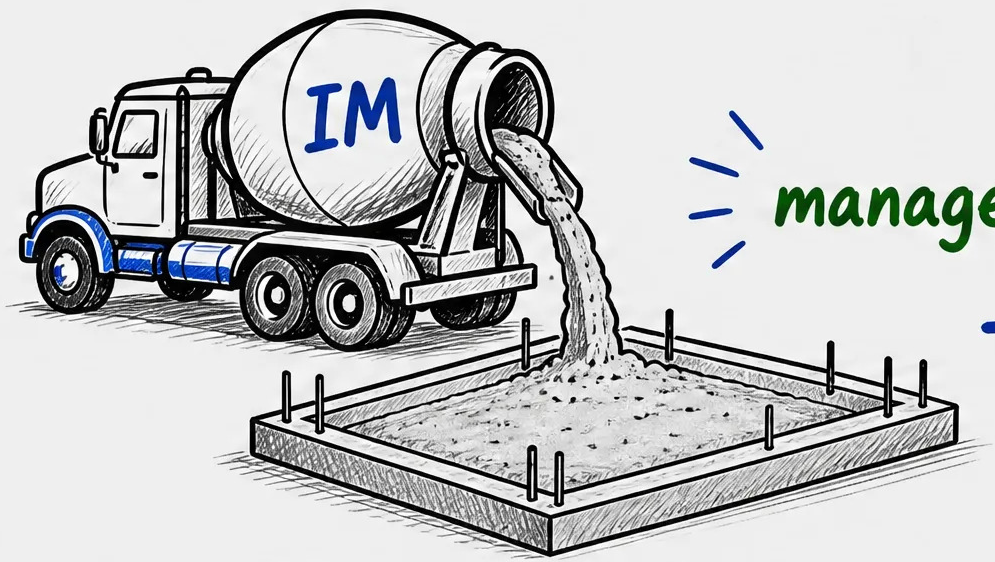

The Packaging Utility brings the IBM repository inside your firewall.

Automating Profile Creation

Dr. Lee

Step 1: IM Builds the Foundation

IM engine lays a solid foundation (base profile).

manageprofiles -create

Step 2: manageprofiles Builds the Customized House

manageprofiles builds the customized house (runtime profile).

IM builds the foundation; manageprofiles builds the house.

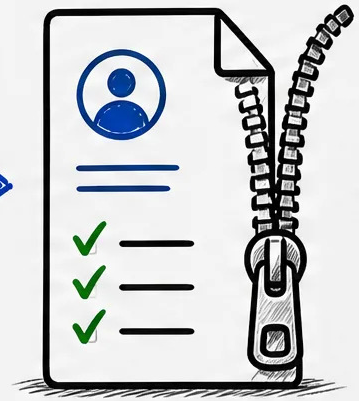

Backing Up Profiles

```
manageprofiles -backupProfile
```

1. Profile in use

2. Backup profile

ZIP IT UP

3. Store safely in Vault

SAFE. SECURE. READY.

4. Apply risky upgrade

A PROFILE BACKUP IS YOUR FASTEST ROLLBACK STRATEGY.

Deleting and Unaugmenting

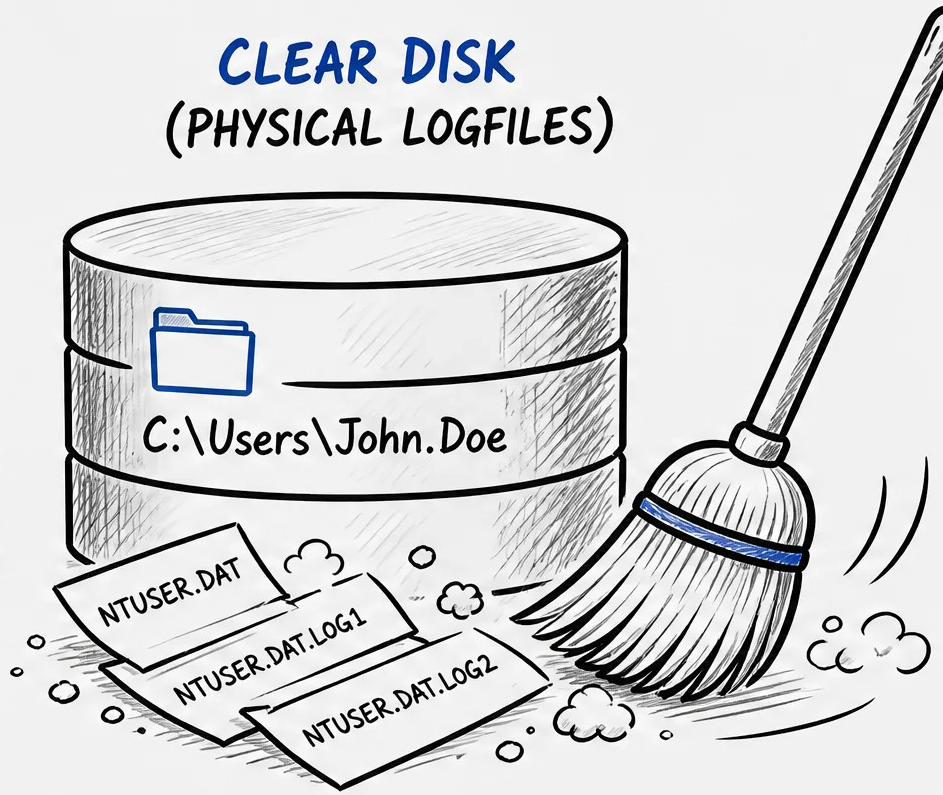

Dr. Lee

UNREGISTER
(FROM REGISTRY)

ProfileList	
S-1-5-21-1000	John.Doe
~~S-1-5-21-1001~~	~~Jane.Smith~~
S-1-5-21-1002	Bob.Jones
S-1-5-21-1003	Alice.Brown
...	

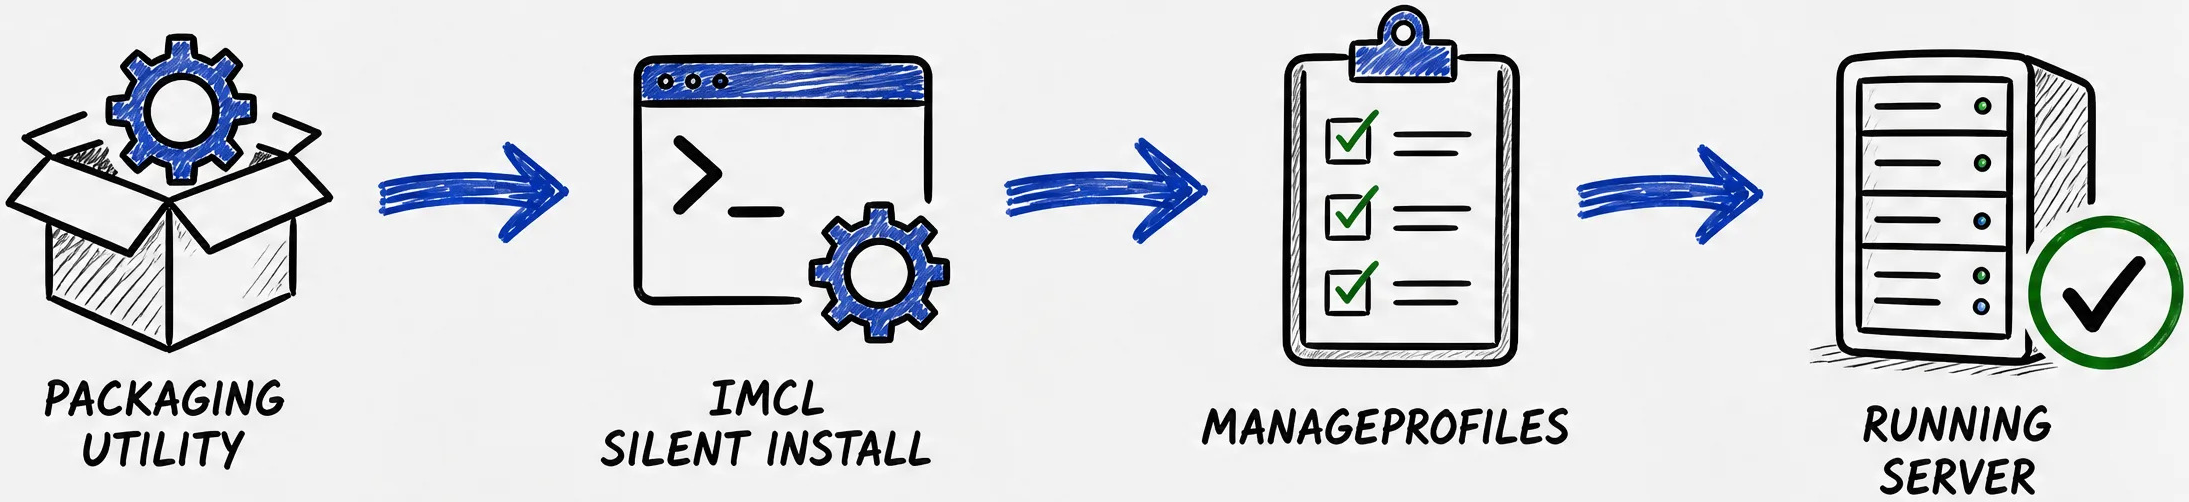

`manageprofiles -delete`

CLEAR DISK
(PHYSICAL LOGFILES)

DELETION UNRREGISTERS THE PROFILE;
YOU MUST MANUALLY CLEAR THE DISK.

Module 6 Summary

The Automated Pipeline

Automation is the only way to **manage a fleet.**
